

DUTCH DEFENSE

Dutch Defense

ECO A80 | 19 named lines in this code

Featured opening position - gold marks the last move

IS IT A GOOD OPENING?

Playable, but White has a meaningful objective edge. Black needs accurate counterplay.

ENGINE SNAPSHOT

+0.69 for White. A shallow opening score is a guide, not a forced result.

GAME CHARACTER

Unbalanced and ambitious: both sides usually receive active plans and real winning chances.

WHAT THIS OPENING IS

A80 covers Dutch Defense. Black uses ...f5 to contest e4 and accepts some kingside looseness in exchange for active, unbalanced play. The diagram uses the featured line Dutch Defense.

DEFINING ROUTE

1. d4 f5

UNDERSTAND THE POSITION

What both sides are trying to achieve

WHITE'S GOALS

Challenge the dark squares, use the e-file and queenside, and punish slow development or an exposed Black king.

BLACK'S GOALS

Control e4, develop the kingside efficiently, and prepare ...e5 or a kingside initiative without neglecting the center.

PAWN BREAKS - THE ENGINE OF THE OPENING

Black usually wants ...e5; White often counters with e4, d5, or a queenside expansion.

PIECE MAP

The f5 pawn needs coordinated support. White's light-squared bishop and central knights often target e6 and e5. The central pawn placement should decide where each bishop and knight belongs.

WHAT USUALLY GOES WRONG

Black must check diagonal and king-safety tactics before every aggressive pawn move. Recheck the center after every opponent deviation; opening names do not make moves automatic.

POSITION SNAPSHOT

White moves next. Material is level. Central markers: White pawn on d4, Black pawn on f5.

WHO SHOULD STUDY IT?

A good fighting defense for players who accept risk and want winning chances rather than symmetry.
