ECO C10 | 10 named lines in this code

Featured opening position - gold marks the last move

IS IT A GOOD OPENING?

Good and fully playable. The position remains within a normal opening balance for both sides.

ENGINE SNAPSHOT

+0.32 for White. A shallow opening score is a guide, not a forced result.

GAME CHARACTER

Principled and instructive: development and central breaks lead naturally into the middlegame.

WHAT THIS OPENING IS

C10 covers French Defense. Black builds a d5-e6 center and accepts a temporarily restricted c8 bishop in exchange for a clear attack on White's center. The diagram uses the featured line French Defense: Paulsen Variation.

DEFINING ROUTE

1. e4 e6 2. d4 d5 3. Nc3

UNDERSTAND THE POSITION

What both sides are trying to achieve

WHITE'S GOALS

Use the space advantage, support the e5 chain when it exists, and develop before beginning a kingside attack.

BLACK'S GOALS

Challenge d4 with ...c5, attack e5 with ...f6 when sound, and solve the c8 bishop deliberately.

PAWN BREAKS - THE ENGINE OF THE OPENING

...c5 is the basic break; ...f6 is the second. White often uses c3, f4-f5, or queenside play depending on the structure.

PIECE MAP

White's e5 pawn can gain space but needs support. Black's bad bishop often becomes active after ...b6 and ...Ba6 or after exchanges. The central pawn placement should decide where each bishop and knight belongs.

WHAT USUALLY GOES WRONG

Both sides can misjudge the pawn chain: attack its base and calculate breaks rather than attacking where the chain is strongest. Recheck the center after every opponent deviation; opening names do not make moves automatic.

POSITION SNAPSHOT

Black moves next. Material is level. Central markers: White pawn on d4, Black pawn on d5, White pawn on e4, Black pawn on e6.

WHO SHOULD STUDY IT?

A sound, excellent defense with clear plans and rich counterplay, though cramped positions require patience.
