## UNDERSTAND THE POSITION

# What both sides are trying to achieve

**WHITE'S GOALS**

Support the center with pieces, convert space into activity, and be ready to advance or return pawns to preserve coordination.

**BLACK'S GOALS**

Pressure d4, use the g7 bishop and c-file, and arrange ...c5 or ...e5 before White consolidates.

**PAWN BREAKS - THE ENGINE OF THE OPENING**

...c5 is the primary challenge and ...e5 is the alternative; White may advance d5 or use e5 under the right conditions.

**PIECE MAP**

The g7 bishop and pressure on d4 define Black's play. White's center is strong only while the pieces defend it. White's g2 bishop makes the long diagonal a strategic asset. black's g7 bishop is aimed at the center and queenside.

**WHAT USUALLY GOES WRONG**

Material gain in the center can be temporary if development and diagonal pressure are ignored. Recheck the center after every opponent deviation; opening names do not make moves automatic.

**POSITION SNAPSHOT**

White moves next. Material is level. Central markers: White pawn on d4.

**WHO SHOULD STUDY IT?**

A world-class, highly dynamic defense; excellent for players willing to learn concrete theory.
