Featured opening position - gold marks the last move

IS IT A GOOD OPENING?

Good and fully playable. The position remains within a normal opening balance for both sides.

ENGINE SNAPSHOT

+0.47 for White. A shallow opening score is a guide, not a forced result.

GAME CHARACTER

Strategic and flexible: small move-order choices decide which pawn structure appears.

WHAT THIS OPENING IS

UNDERSTAND THE POSITION

What both sides are trying to achieve

WHITE'S GOALS

Use the long diagonal, recover a sacrificed c-pawn without losing coordination, and press queenside weaknesses patiently.

BLACK'S GOALS

Choose whether to hold c4, return it for development, or close the diagonal; seek ...c5 or ...e5 for freedom.

PAWN BREAKS - THE ENGINE OF THE OPENING

Black's ...c5 and ...e5 challenge the center; White often uses Ne5, Qc2, and a4 to recover or undermine c4.

PIECE MAP

The g2 bishop is the soul of White's position. Black must manage the a8-h1 diagonal and queenside development. White's g2 bishop makes the long diagonal a strategic asset.

WHAT USUALLY GOES WRONG

White should not rush to regain a pawn if doing so loses the initiative; Black should not cling to it at any cost. Recheck the center after every opponent deviation; opening names do not make moves automatic.

POSITION SNAPSHOT

Black moves next. Material is level. Central markers: White pawn on c4, White pawn on d4, Black pawn on d5, Black pawn on e6.

WHO SHOULD STUDY IT?

A top-class strategic opening, especially strong for players who enjoy durable pressure rather than forced attacks.
