Candidate Moves and Choice

Search widely enough, then choose decisively

INSIDE THIS VOLUME

50

coaching lessons

10

five-part modules

66

phone-friendly pages

Original teaching synthesis: practical advice, logical reasons, limits, board questions, and drills.

THE COACH-IN-YOUR-EAR METHOD

Advice becomes strength only when you can retrieve and apply it.

1. LEARN THE CAUSAL CHAIN

Read the instruction, then explain why it should work. If you cannot connect board feature to move and consequence, you have memorized a slogan rather than learned a tool.

2. USE ALL FIVE LESSONS

Each module separates the core rule, recognition cues, an over-the-board routine, limits and exceptions, and a training habit. Study the set as one skill.

3. RETRIEVE FROM A POSITION

Hide the page, set up a board, and answer the board question before choosing a move. Recognition under uncertainty is the bridge from reading to playing.

4. VERIFY CONCRETE CHESS

Advice organizes attention; it never overrules legality, tactics, or exact calculation. Test the opponent's strongest forcing reply before acting.

5. SPACE THE REVIEWS

Review the module after 1, 3, 7, 14, and 30 days. Mark it learned only when you can state the idea, its boundary, and a real game example without looking.

These are original synthesized lessons, not quotations attributed to any particular grandmaster. The course distills widely established chess reasoning into a practical curriculum.

MODULES 1-5

Volume roadmap

MODULE 01 | ADVICE 0101-0105 | PAGE 5

Begin with Forcing Candidates

Examine serious checks, captures, and direct threats before quiet moves.

MODULE 02 | ADVICE 0106-0110 | PAGE 11

Include One Quiet Improving Move

After forcing moves, add a candidate that improves the worst piece, restricts counterplay, or prepares a break.

MODULE 03 | ADVICE 0111-0115 | PAGE 17

Generate from Plans and Features

Let threats, weak squares, pawn breaks, bad pieces, and favorable exchanges each suggest candidates.

MODULE 04 | ADVICE 0116-0120 | PAGE 23

Limit the Serious Candidate List

Usually calculate two to four serious moves rather than every legal move.

MODULE 05 | ADVICE 0121-0125 | PAGE 29

Keep a Candidate Alive Until Refuted

Reject a move only for a stated tactical, evaluative, or practical reason.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

MODULES 6-10

Volume roadmap

MODULE 06 | ADVICE 0126-0130 | PAGE 35

Search for the Opponent's Best Reply

For each candidate, begin with the most forcing and least cooperative response.

MODULE 07 | ADVICE 0131-0135 | PAGE 41

Compare Candidates at Equal Depth

Bring competing moves to similarly stable endpoints before deciding.

MODULE 08 | ADVICE 0136-0140 | PAGE 47

Add an Escape Candidate

When all active ideas seem dangerous, include a consolidating move that reduces tactical risk or changes the problem.

MODULE 09 | ADVICE 0141-0145 | PAGE 53

Reopen Search Only for New Evidence

Once candidates are compared, do not restart unless you discover a concrete tactical resource or a mistaken evaluation.

MODULE 10 | ADVICE 0146-0150 | PAGE 59

Choose the Move You Can Defend

When evaluations are close, prefer the move whose purpose, risks, and likely replies you understand.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

FIVE-PART MODULE | ADVICE 0101-0105

Begin with Forcing Candidates

CORE INSTRUCTION

Examine serious checks, captures, and direct threats before quiet moves.

WHY IT WORKS

Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal.

RECOGNITION CUES

Use when kings are exposed, pieces are loose, or lines can open.

BOUNDARY

A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0101 | MODULE 01 OF 10 | CORE ADVICE

Begin with Forcing Candidates - The Rule

COACH'S INSTRUCTION

Examine serious checks, captures, and direct threats before quiet moves.

WHY IT IS LOGICALLY TRUE

Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal.

USE IT WHEN

Use when kings are exposed, pieces are loose, or lines can open.

BOUNDARY / FAILURE MODE

A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

QUESTION AT THE BOARD

Which forcing move deserves calculation even if it looks strange?

PRACTICAL DRILL

In twenty positions, create a forcing-move list before looking at the solution or strategic plan.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0102 | MODULE 01 OF 10 | RECOGNITION

Begin with Forcing Candidates - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when kings are exposed, pieces are loose, or lines can open.

WHY IT IS LOGICALLY TRUE

Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

QUESTION AT THE BOARD

Which forcing move deserves calculation even if it looks strange?

PRACTICAL DRILL

Recognition drill: In twenty positions, create a forcing-move list before looking at the solution or strategic plan. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0103 | MODULE 01 OF 10 | BOARD USE

Begin with Forcing Candidates - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Which forcing move deserves calculation even if it looks strange?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Examine serious checks, captures, and direct threats before quiet moves.

WHY IT IS LOGICALLY TRUE

Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use when kings are exposed, pieces are loose, or lines can open.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

QUESTION AT THE BOARD

Which forcing move deserves calculation even if it looks strange?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0104 | MODULE 01 OF 10 | EXCEPTIONS

Begin with Forcing Candidates - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal.

USE IT WHEN

Use the normal rule under these conditions: Use when kings are exposed, pieces are loose, or lines can open. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: In twenty positions, create a forcing-move list before looking at the solution or strategic plan. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0105 | MODULE 01 OF 10 | TRAINING

Begin with Forcing Candidates - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Examine serious checks, captures, and direct threats before quiet moves.

WHY IT IS LOGICALLY TRUE

Forcing candidates reduce the opponent's choices and reveal tactical facts that determine whether slower plans are even legal. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: A forcing move can be bad because it drives a king to safety or loses control; prioritize examination, not selection.

QUESTION AT THE BOARD

Which forcing move deserves calculation even if it looks strange?

PRACTICAL DRILL

In twenty positions, create a forcing-move list before looking at the solution or strategic plan. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0106-0110

Include One Quiet Improving Move

CORE INSTRUCTION

After forcing moves, add a candidate that improves the worst piece, restricts counterplay, or prepares a break.

WHY IT WORKS

Many strong moves work by changing future possibilities rather than making an immediate threat. Without a quiet candidate, the search becomes tactically biased.

RECOGNITION CUES

Use in stable middlegames and positions where direct action does not work.

BOUNDARY

Quiet improvement is too slow when there is an immediate tactical emergency.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0106 | MODULE 02 OF 10 | CORE ADVICE

Include One Quiet Improving Move - The Rule

COACH'S INSTRUCTION

After forcing moves, add a candidate that improves the worst piece, restricts counterplay, or prepares a break.

WHY IT IS LOGICALLY TRUE

Many strong moves work by changing future possibilities rather than making an immediate threat. Without a quiet candidate, the search becomes tactically biased.

USE IT WHEN

Use in stable middlegames and positions where direct action does not work.

BOUNDARY / FAILURE MODE

Quiet improvement is too slow when there is an immediate tactical emergency.

QUESTION AT THE BOARD

What useful move would I play if no forcing move existed?

PRACTICAL DRILL

From ten calm positions, find three legal forcing moves and one quiet move; compare their endpoints.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0107 | MODULE 02 OF 10 | RECOGNITION

Include One Quiet Improving Move - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in stable middlegames and positions where direct action does not work.

WHY IT IS LOGICALLY TRUE

Many strong moves work by changing future possibilities rather than making an immediate threat. Without a quiet candidate, the search becomes tactically biased. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Quiet improvement is too slow when there is an immediate tactical emergency.

QUESTION AT THE BOARD

What useful move would I play if no forcing move existed?

PRACTICAL DRILL

Recognition drill: From ten calm positions, find three legal forcing moves and one quiet move; compare their endpoints. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0108 | MODULE 02 OF 10 | BOARD USE

Include One Quiet Improving Move - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What useful move would I play if no forcing move existed?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: After forcing moves, add a candidate that improves the worst piece, restricts counterplay, or prepares a break.

WHY IT IS LOGICALLY TRUE

Many strong moves work by changing future possibilities rather than making an immediate threat. Without a quiet candidate, the search becomes tactically biased. A short routine converts understanding into an action that survives clock pressure.

PRACTICAL DRILL

From ten calm positions, find three legal forcing moves and one quiet move; compare their endpoints. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0111-0115

Generate from Plans and Features

CORE INSTRUCTION

Let threats, weak squares, pawn breaks, bad pieces, and favorable exchanges each suggest candidates.

WHY IT WORKS

Board features are search generators. This makes candidate creation systematic rather than dependent on inspiration.

RECOGNITION CUES

Use when the position feels strategically rich but no move stands out.

BOUNDARY

Do not force one candidate from every category; only include moves that address a real feature.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0111 | MODULE 03 OF 10 | CORE ADVICE

Generate from Plans and Features - The Rule

COACH'S INSTRUCTION

Let threats, weak squares, pawn breaks, bad pieces, and favorable exchanges each suggest candidates.

WHY IT IS LOGICALLY TRUE

Board features are search generators. This makes candidate creation systematic rather than dependent on inspiration.

USE IT WHEN

Use when the position feels strategically rich but no move stands out.

BOUNDARY / FAILURE MODE

Do not force one candidate from every category; only include moves that address a real feature.

QUESTION AT THE BOARD

Which visible feature has not yet produced a candidate?

PRACTICAL DRILL

Label five features in a position and write one move suggested by each, then prune the list to three.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0112 | MODULE 03 OF 10 | RECOGNITION

Generate from Plans and Features - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when the position feels strategically rich but no move stands out.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0116-0120

Limit the Serious Candidate List

CORE INSTRUCTION

Usually calculate two to four serious moves rather than every legal move.

WHY IT WORKS

Working memory is limited. A compact list allows deeper, more accurate comparison while preserving coverage of distinct ideas.

RECOGNITION CUES

Use in ordinary non-forced positions.

BOUNDARY

Tactical puzzles and highly forcing positions may require a wider search to find an unusual move.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0116 | MODULE 04 OF 10 | CORE ADVICE

Limit the Serious Candidate List - The Rule

COACH'S INSTRUCTION

Usually calculate two to four serious moves rather than every legal move.

WHY IT IS LOGICALLY TRUE

Working memory is limited. A compact list allows deeper, more accurate comparison while preserving coverage of distinct ideas.

USE IT WHEN

Use in ordinary non-forced positions.

BOUNDARY / FAILURE MODE

Tactical puzzles and highly forcing positions may require a wider search to find an unusual move.

QUESTION AT THE BOARD

Are these candidates genuinely different, or cosmetic versions of one idea?

PRACTICAL DRILL

Time yourself generating exactly three candidates in thirty positions, then compare to master choices.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0117 | MODULE 04 OF 10 | RECOGNITION

Limit the Serious Candidate List - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in ordinary non-forced positions.

WHY IT IS LOGICALLY TRUE

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0121-0125

Keep a Candidate Alive Until Refuted

CORE INSTRUCTION

Reject a move only for a stated tactical, evaluative, or practical reason.

WHY IT WORKS

Vague discomfort can discard the best move, while unspoken optimism can preserve a bad one. Explicit rejection makes search auditable.

RECOGNITION CUES

Use when a move is surprising, sacrificial, or positionally ugly.

BOUNDARY

Under severe time pressure, intuitive pruning is necessary; train intuition later by reviewing discarded moves.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0121 | MODULE 05 OF 10 | CORE ADVICE

Keep a Candidate Alive Until Refuted - The Rule

COACH'S INSTRUCTION

Reject a move only for a stated tactical, evaluative, or practical reason.

WHY IT IS LOGICALLY TRUE

Vague discomfort can discard the best move, while unspoken optimism can preserve a bad one. Explicit rejection makes search auditable.

USE IT WHEN

Use when a move is surprising, sacrificial, or positionally ugly.

BOUNDARY / FAILURE MODE

Under severe time pressure, intuitive pruning is necessary; train intuition later by reviewing discarded moves.

QUESTION AT THE BOARD

What exact line or endpoint makes me reject this move?

PRACTICAL DRILL

During analysis, keep a rejection log with one sentence for every serious candidate you abandon.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0122 | MODULE 05 OF 10 | RECOGNITION

Keep a Candidate Alive Until Refuted - How to Notice It

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0126-0130

Search for the Opponent's Best Reply

CORE INSTRUCTION

For each candidate, begin with the most forcing and least cooperative response.

WHY IT WORKS

A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early.

RECOGNITION CUES

Use for attacks, sacrifices, pawn grabs, and simplifications.

BOUNDARY

The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0126 | MODULE 06 OF 10 | CORE ADVICE

Search for the Opponent's Best Reply - The Rule

COACH'S INSTRUCTION

For each candidate, begin with the most forcing and least cooperative response.

WHY IT IS LOGICALLY TRUE

A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early.

USE IT WHEN

Use for attacks, sacrifices, pawn grabs, and simplifications.

BOUNDARY / FAILURE MODE

The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

QUESTION AT THE BOARD

How would a strong defender make this candidate look foolish?

PRACTICAL DRILL

Analyze ten attacking positions by finding the defense first, then decide whether the attack still works.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0127 | MODULE 06 OF 10 | RECOGNITION

Search for the Opponent's Best Reply - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for attacks, sacrifices, pawn grabs, and simplifications.

WHY IT IS LOGICALLY TRUE

A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

QUESTION AT THE BOARD

How would a strong defender make this candidate look foolish?

PRACTICAL DRILL

Recognition drill: Analyze ten attacking positions by finding the defense first, then decide whether the attack still works. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0128 | MODULE 06 OF 10 | BOARD USE

Search for the Opponent's Best Reply - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'How would a strong defender make this candidate look foolish?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: For each candidate, begin with the most forcing and least cooperative response.

WHY IT IS LOGICALLY TRUE

A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use for attacks, sacrifices, pawn grabs, and simplifications.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

QUESTION AT THE BOARD

How would a strong defender make this candidate look foolish?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0129 | MODULE 06 OF 10 | EXCEPTIONS

Search for the Opponent's Best Reply - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early.

USE IT WHEN

Use the normal rule under these conditions: Use for attacks, sacrifices, pawn grabs, and simplifications. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Analyze ten attacking positions by finding the defense first, then decide whether the attack still works. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0130 | MODULE 06 OF 10 | TRAINING

Search for the Opponent's Best Reply - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: For each candidate, begin with the most forcing and least cooperative response.

WHY IT IS LOGICALLY TRUE

A move's value is bounded by the strongest reply, not by the reply you hope to see. Adversarial search exposes wishful lines early. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: The objectively best reply may be hard to find in practice, but you should know whether your move depends on it being missed.

QUESTION AT THE BOARD

How would a strong defender make this candidate look foolish?

PRACTICAL DRILL

Analyze ten attacking positions by finding the defense first, then decide whether the attack still works. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0131-0135

Compare Candidates at Equal Depth

CORE INSTRUCTION

Bring competing moves to similarly stable endpoints before deciding.

WHY IT WORKS

One line can look better merely because you stopped it at a favorable moment while calculating another through its difficulties.

RECOGNITION CUES

Use when two moves remain plausible after initial screening.

BOUNDARY

Forcing lines may naturally require different depths; equality means comparable stability, not identical ply counts.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0131 | MODULE 07 OF 10 | CORE ADVICE

Compare Candidates at Equal Depth - The Rule

COACH'S INSTRUCTION

Bring competing moves to similarly stable endpoints before deciding.

WHY IT IS LOGICALLY TRUE

One line can look better merely because you stopped it at a favorable moment while calculating another through its difficulties.

USE IT WHEN

Use when two moves remain plausible after initial screening.

BOUNDARY / FAILURE MODE

Forcing lines may naturally require different depths; equality means comparable stability, not identical ply counts.

QUESTION AT THE BOARD

Have I compared finished ideas or one endpoint against one hope?

PRACTICAL DRILL

Pick two candidate moves in five positions and write why each branch has reached a stable evaluation.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0132 | MODULE 07 OF 10 | RECOGNITION

Compare Candidates at Equal Depth - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when two moves remain plausible after initial screening.

WHY IT IS LOGICALLY TRUE

One line can look better merely because you stopped it at a favorable moment while calculating another through its difficulties. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0136-0140

Add an Escape Candidate

CORE INSTRUCTION

When all active ideas seem dangerous, include a consolidating move that reduces tactical risk or changes the problem.

WHY IT WORKS

Good decision-making needs an outside option. A safe candidate prevents false choices between two overambitious moves.

RECOGNITION CUES

Use when under attack, worse, low on time, or unsure of calculation.

BOUNDARY

Excessive caution can surrender initiative; the escape candidate must solve a real problem without creating a larger one.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0136 | MODULE 08 OF 10 | CORE ADVICE

Add an Escape Candidate - The Rule

COACH'S INSTRUCTION

When all active ideas seem dangerous, include a consolidating move that reduces tactical risk or changes the problem.

WHY IT IS LOGICALLY TRUE

Good decision-making needs an outside option. A safe candidate prevents false choices between two overambitious moves.

USE IT WHEN

Use when under attack, worse, low on time, or unsure of calculation.

BOUNDARY / FAILURE MODE

Excessive caution can surrender initiative; the escape candidate must solve a real problem without creating a larger one.

QUESTION AT THE BOARD

What move makes the position easier to play without conceding something essential?

PRACTICAL DRILL

In difficult positions, deliberately find one active, one neutral, and one simplifying candidate.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0137 | MODULE 08 OF 10 | RECOGNITION

Add an Escape Candidate - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when under attack, worse, low on time, or unsure of calculation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0141-0145

Reopen Search Only for New Evidence

CORE INSTRUCTION

Once candidates are compared, do not restart unless you discover a concrete tactical resource or a mistaken evaluation.

WHY IT WORKS

Endless rechecking consumes time and often lowers confidence without improving accuracy. A stopping rule protects the clock.

RECOGNITION CUES

Use after completing a disciplined comparison.

BOUNDARY

If verification finds a forcing refutation, reopen the search immediately.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0141 | MODULE 09 OF 10 | CORE ADVICE

Reopen Search Only for New Evidence - The Rule

COACH'S INSTRUCTION

Once candidates are compared, do not restart unless you discover a concrete tactical resource or a mistaken evaluation.

WHY IT IS LOGICALLY TRUE

Endless rechecking consumes time and often lowers confidence without improving accuracy. A stopping rule protects the clock.

USE IT WHEN

Use after completing a disciplined comparison.

BOUNDARY / FAILURE MODE

If verification finds a forcing refutation, reopen the search immediately.

QUESTION AT THE BOARD

Did I find new information, or am I merely anxious?

PRACTICAL DRILL

Track every time you restart calculation in a slow game and classify it as evidence-driven or emotion-driven.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0142 | MODULE 09 OF 10 | RECOGNITION

Reopen Search Only for New Evidence - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after completing a disciplined comparison.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0146-0150

Choose the Move You Can Defend

CORE INSTRUCTION

When evaluations are close, prefer the move whose purpose, risks, and likely replies you understand.

WHY IT WORKS

Practical accuracy depends on navigating future decisions. A tiny theoretical edge is worthless if its consequences are opaque to you.

RECOGNITION CUES

Use in non-forced choices, unfamiliar structures, and time pressure.

BOUNDARY

Do not reject a clearly winning move solely because it is unfamiliar; calculate and learn it when the evidence is strong.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0146 | MODULE 10 OF 10 | CORE ADVICE

Choose the Move You Can Defend - The Rule

COACH'S INSTRUCTION

When evaluations are close, prefer the move whose purpose, risks, and likely replies you understand.

WHY IT IS LOGICALLY TRUE

Practical accuracy depends on navigating future decisions. A tiny theoretical edge is worthless if its consequences are opaque to you.

USE IT WHEN

Use in non-forced choices, unfamiliar structures, and time pressure.

BOUNDARY / FAILURE MODE

Do not reject a clearly winning move solely because it is unfamiliar; calculate and learn it when the evidence is strong.

QUESTION AT THE BOARD

Can I explain this move and the next two decisions in plain language?

PRACTICAL DRILL

Before committing in training games, state the chosen move's purpose, main reply, and follow-up aloud.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0147 | MODULE 10 OF 10 | RECOGNITION

Choose the Move You Can Defend - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in non-forced choices, unfamiliar structures, and time pressure.

Before committing in training games, state the chosen move's purpose, main reply, and follow-up aloud. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

RETRIEVAL TEST

Can you coach yourself through all ten modules?

01 Begin with Forcing Candidates

Which forcing move deserves calculation even if it looks strange?

02 Include One Quiet Improving Move

What useful move would I play if no forcing move existed?

03 Generate from Plans and Features

Which visible feature has not yet produced a candidate?

04 Limit the Serious Candidate List

Are these candidates genuinely different, or cosmetic versions of one idea?

05 Keep a Candidate Alive Until Refuted

What exact line or endpoint makes me reject this move?

06 Search for the Opponent's Best Reply

How would a strong defender make this candidate look foolish?

07 Compare Candidates at Equal Depth

Have I compared finished ideas or one endpoint against one hope?

08 Add an Escape Candidate

What move makes the position easier to play without conceding something essential?

09 Reopen Search Only for New Evidence

Did I find new information, or am I merely anxious?

10 Choose the Move You Can Defend

Can I explain this move and the next two decisions in plain language?

Pass standard: state the core advice, explain the causal reason, name one exception, and apply the board question to a fresh position.

COMPLETION TEST

Choose a fresh position. Without notes, identify the main problem, recall the relevant advice, state its limit, generate candidates, and test the opponent's best reply. Date the volume only when the method appears naturally in slow games.
