Calculation That You Can Trust

See concrete lines without drowning in branches

INSIDE THIS VOLUME

50

coaching lessons

10

five-part modules

66

phone-friendly pages

Original teaching synthesis: practical advice, logical reasons, limits, board questions, and drills.

THE COACH-IN-YOUR-EAR METHOD

Advice becomes strength only when you can retrieve and apply it.

1. LEARN THE CAUSAL CHAIN

Read the instruction, then explain why it should work. If you cannot connect board feature to move and consequence, you have memorized a slogan rather than learned a tool.

2. USE ALL FIVE LESSONS

Each module separates the core rule, recognition cues, an over-the-board routine, limits and exceptions, and a training habit. Study the set as one skill.

3. RETRIEVE FROM A POSITION

Hide the page, set up a board, and answer the board question before choosing a move. Recognition under uncertainty is the bridge from reading to playing.

4. VERIFY CONCRETE CHESS

Advice organizes attention; it never overrules legality, tactics, or exact calculation. Test the opponent's strongest forcing reply before acting.

5. SPACE THE REVIEWS

Review the module after 1, 3, 7, 14, and 30 days. Mark it learned only when you can state the idea, its boundary, and a real game example without looking.

These are original synthesized lessons, not quotations attributed to any particular grandmaster. The course distills widely established chess reasoning into a practical curriculum.

MODULES 1-5

Volume roadmap

MODULE 01 | ADVICE 0151-0155 | PAGE 5

Calculate Forcing Lines First

Order calculation by checks, forcing captures, direct threats, and only then quieter continuations.

MODULE 02 | ADVICE 0156-0160 | PAGE 11

Visualize One Move at a Time

Update piece locations, lines, and legal moves after each imagined move instead of jumping to an anticipated final picture.

MODULE 03 | ADVICE 0161-0165 | PAGE 17

Make the Opponent Difficult

In every branch, search for their checks, captures, threats, simplifying moves, and counterattacks.

MODULE 04 | ADVICE 0166-0170 | PAGE 23

Stop at a Stable Endpoint

End a branch when forcing play has settled and you can evaluate material, king safety, activity, structure, and future plans.

MODULE 05 | ADVICE 0171-0175 | PAGE 29

Count Before and After

Keep a running inventory of material during combinations and recount at the endpoint.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

MODULES 6-10

Volume roadmap

MODULE 06 | ADVICE 0176-0180 | PAGE 35

Track Critical Squares

During a line, note newly vacated, occupied, defended, or controlled squares that affect checks, escapes, and recaptures.

MODULE 07 | ADVICE 0181-0185 | PAGE 41

Use Branch Pruning with Reasons

Stop analyzing a branch when it is illegal, clearly inferior, forced into a known endpoint, or dominated by another line.

MODULE 08 | ADVICE 0186-0190 | PAGE 47

Verify Move Order

When two useful moves are available, test whether changing the order permits a defense, creates a tempo, or alters a recapture.

MODULE 09 | ADVICE 0191-0195 | PAGE 53

Recalculate After a Surprise

When the opponent deviates, discard the old line and rebuild from the actual board.

MODULE 10 | ADVICE 0196-0200 | PAGE 59

State the Final Evaluation in Words

At the endpoint, name the material balance, king safety, activity, structure, and next plan.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

FIVE-PART MODULE | ADVICE 0151-0155

Calculate Forcing Lines First

CORE INSTRUCTION

Order calculation by checks, forcing captures, direct threats, and only then quieter continuations.

WHY IT WORKS

Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most.

RECOGNITION CUES

Use in tactical positions and whenever a king or queen is exposed.

BOUNDARY

A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0151 | MODULE 01 OF 10 | CORE ADVICE

Calculate Forcing Lines First - The Rule

COACH'S INSTRUCTION

Order calculation by checks, forcing captures, direct threats, and only then quieter continuations.

WHY IT IS LOGICALLY TRUE

Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most.

USE IT WHEN

Use in tactical positions and whenever a king or queen is exposed.

BOUNDARY / FAILURE MODE

A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

QUESTION AT THE BOARD

Which branch can force the position to clarify fastest?

PRACTICAL DRILL

Solve puzzles while writing the exact order in which you considered candidates, then compare efficiency.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0152 | MODULE 01 OF 10 | RECOGNITION

Calculate Forcing Lines First - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in tactical positions and whenever a king or queen is exposed.

WHY IT IS LOGICALLY TRUE

Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

QUESTION AT THE BOARD

Which branch can force the position to clarify fastest?

PRACTICAL DRILL

Recognition drill: Solve puzzles while writing the exact order in which you considered candidates, then compare efficiency. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0153 | MODULE 01 OF 10 | BOARD USE

Calculate Forcing Lines First - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Which branch can force the position to clarify fastest?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Order calculation by checks, forcing captures, direct threats, and only then quieter continuations.

WHY IT IS LOGICALLY TRUE

Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in tactical positions and whenever a king or queen is exposed.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

QUESTION AT THE BOARD

Which branch can force the position to clarify fastest?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0154 | MODULE 01 OF 10 | EXCEPTIONS

Calculate Forcing Lines First - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most.

USE IT WHEN

Use the normal rule under these conditions: Use in tactical positions and whenever a king or queen is exposed. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Solve puzzles while writing the exact order in which you considered candidates, then compare efficiency. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0155 | MODULE 01 OF 10 | TRAINING

Calculate Forcing Lines First - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Order calculation by checks, forcing captures, direct threats, and only then quieter continuations.

WHY IT IS LOGICALLY TRUE

Restrictive moves shrink the tree and can make slower branches irrelevant. Efficient order increases depth where accuracy matters most. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: A quiet move may be the only winning move; the ordering rule cannot replace broad candidate generation.

QUESTION AT THE BOARD

Which branch can force the position to clarify fastest?

PRACTICAL DRILL

Solve puzzles while writing the exact order in which you considered candidates, then compare efficiency. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0156-0160

Visualize One Move at a Time

CORE INSTRUCTION

Update piece locations, lines, and legal moves after each imagined move instead of jumping to an anticipated final picture.

WHY IT WORKS

Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines.

RECOGNITION CUES

Use in capture sequences, discovered attacks, promotions, and king hunts.

BOUNDARY

Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0156 | MODULE 02 OF 10 | CORE ADVICE

Visualize One Move at a Time - The Rule

COACH'S INSTRUCTION

Update piece locations, lines, and legal moves after each imagined move instead of jumping to an anticipated final picture.

WHY IT IS LOGICALLY TRUE

Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines.

USE IT WHEN

Use in capture sequences, discovered attacks, promotions, and king hunts.

BOUNDARY / FAILURE MODE

Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

QUESTION AT THE BOARD

What changed on the board after this one move?

PRACTICAL DRILL

Replay ten tactical lines without moving pieces, naming every changed line after each ply.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0157 | MODULE 02 OF 10 | RECOGNITION

Visualize One Move at a Time - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in capture sequences, discovered attacks, promotions, and king hunts.

WHY IT IS LOGICALLY TRUE

Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

QUESTION AT THE BOARD

What changed on the board after this one move?

PRACTICAL DRILL

Recognition drill: Replay ten tactical lines without moving pieces, naming every changed line after each ply. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0158 | MODULE 02 OF 10 | BOARD USE

Visualize One Move at a Time - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What changed on the board after this one move?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Update piece locations, lines, and legal moves after each imagined move instead of jumping to an anticipated final picture.

WHY IT IS LOGICALLY TRUE

Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in capture sequences, discovered attacks, promotions, and king hunts.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

QUESTION AT THE BOARD

What changed on the board after this one move?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0159 | MODULE 02 OF 10 | EXCEPTIONS

Visualize One Move at a Time - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines.

USE IT WHEN

Use the normal rule under these conditions: Use in capture sequences, discovered attacks, promotions, and king hunts. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Replay ten tactical lines without moving pieces, naming every changed line after each ply. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0160 | MODULE 02 OF 10 | TRAINING

Visualize One Move at a Time - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Update piece locations, lines, and legal moves after each imagined move instead of jumping to an anticipated final picture.

WHY IT IS LOGICALLY TRUE

Board geometry is state-dependent. Incremental updates prevent ghost defenders, illegal captures, and forgotten opened lines. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Familiar short patterns may be recognized instantly, but verify the critical geometry before trusting them.

QUESTION AT THE BOARD

What changed on the board after this one move?

PRACTICAL DRILL

Replay ten tactical lines without moving pieces, naming every changed line after each ply. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0161-0165

Make the Opponent Difficult

CORE INSTRUCTION

In every branch, search for their checks, captures, threats, simplifying moves, and counterattacks.

WHY IT WORKS

Calculation is a contest of best responses. Cooperative lines exaggerate the value of attacks and conceal tactical reversals.

RECOGNITION CUES

Use whenever your line begins with "if they..." and the reply seems convenient.

BOUNDARY

Practical traps can be valid choices, but evaluate the best defense and the trap's downside explicitly.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0161 | MODULE 03 OF 10 | CORE ADVICE

Make the Opponent Difficult - The Rule

COACH'S INSTRUCTION

In every branch, search for their checks, captures, threats, simplifying moves, and counterattacks.

WHY IT IS LOGICALLY TRUE

Calculation is a contest of best responses. Cooperative lines exaggerate the value of attacks and conceal tactical reversals.

USE IT WHEN

Use whenever your line begins with "if they..." and the reply seems convenient.

BOUNDARY / FAILURE MODE

Practical traps can be valid choices, but evaluate the best defense and the trap's downside explicitly.

QUESTION AT THE BOARD

What reply would I least like to face?

PRACTICAL DRILL

Take solved combinations and replace the published defense with the strongest alternative you can find.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0162 | MODULE 03 OF 10 | RECOGNITION

Make the Opponent Difficult - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use whenever your line begins with "if they..." and the reply seems convenient.

PRACTICAL DRILL

Take solved combinations and replace the published defense with the strongest alternative you can find. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0166-0170

Stop at a Stable Endpoint

CORE INSTRUCTION

End a branch when forcing play has settled and you can evaluate material, king safety, activity, structure, and future plans.

WHY IT WORKS

Fixed depth is arbitrary. Stability ensures the conclusion describes a position rather than the temporary middle of a tactic.

RECOGNITION CUES

Use for every serious branch, especially exchanges and sacrifices.

BOUNDARY

Some positions remain dynamically unclear; then state the uncertainty and compare risk rather than inventing precision.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0166 | MODULE 04 OF 10 | CORE ADVICE

Stop at a Stable Endpoint - The Rule

COACH'S INSTRUCTION

End a branch when forcing play has settled and you can evaluate material, king safety, activity, structure, and future plans.

WHY IT IS LOGICALLY TRUE

Fixed depth is arbitrary. Stability ensures the conclusion describes a position rather than the temporary middle of a tactic.

USE IT WHEN

Use for every serious branch, especially exchanges and sacrifices.

BOUNDARY / FAILURE MODE

Some positions remain dynamically unclear; then state the uncertainty and compare risk rather than inventing precision.

QUESTION AT THE BOARD

Has the tactical storm ended enough to evaluate honestly?

PRACTICAL DRILL

For ten lines, mark the first stable endpoint and explain why stopping one move earlier would mislead.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0167 | MODULE 04 OF 10 | RECOGNITION

Stop at a Stable Endpoint - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for every serious branch, especially exchanges and sacrifices.

WHY IT IS LOGICALLY TRUE

Fixed depth is arbitrary. Stability ensures the conclusion describes a position rather than the temporary middle of a tactic. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0171-0175

Count Before and After

CORE INSTRUCTION

Keep a running inventory of material during combinations and recount at the endpoint.

WHY IT WORKS

Sacrifices, recaptures, and zwischenzugs distort intuitive counting. Exact material is one anchor of evaluation.

RECOGNITION CUES

Use whenever more than one capture occurs or a promotion is possible.

BOUNDARY

Material is not the whole evaluation; initiative and king safety may dominate temporarily.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0171 | MODULE 05 OF 10 | CORE ADVICE

Count Before and After - The Rule

COACH'S INSTRUCTION

Keep a running inventory of material during combinations and recount at the endpoint.

WHY IT IS LOGICALLY TRUE

Sacrifices, recaptures, and zwischenzugs distort intuitive counting. Exact material is one anchor of evaluation.

USE IT WHEN

Use whenever more than one capture occurs or a promotion is possible.

BOUNDARY / FAILURE MODE

Material is not the whole evaluation; initiative and king safety may dominate temporarily.

QUESTION AT THE BOARD

What exactly was exchanged, and what remains?

PRACTICAL DRILL

Practice thirty capture sequences by predicting the final material balance before moving the pieces.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0172 | MODULE 05 OF 10 | RECOGNITION

Count Before and After - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use whenever more than one capture occurs or a promotion is possible.

WHY IT IS LOGICALLY TRUE

Sacrifices, recaptures, and zwischenzugs distort intuitive counting. Exact material is one anchor of evaluation. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Material is not the whole evaluation; initiative and king safety may dominate temporarily.

QUESTION AT THE BOARD

What exactly was exchanged, and what remains?

PRACTICAL DRILL

Recognition drill: Practice thirty capture sequences by predicting the final material balance before moving the pieces. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0173 | MODULE 05 OF 10 | BOARD USE

Count Before and After - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What exactly was exchanged, and what remains?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Keep a running inventory of material during combinations and recount at the endpoint.

WHY IT IS LOGICALLY TRUE

Sacrifices, recaptures, and zwischenzugs distort intuitive counting. Exact material is one anchor of evaluation. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use whenever more than one capture occurs or a promotion is possible.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Material is not the whole evaluation; initiative and king safety may dominate temporarily.

QUESTION AT THE BOARD

Practice thirty capture sequences by predicting the final material balance before moving the pieces. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0176-0180

Track Critical Squares

CORE INSTRUCTION

During a line, note newly vacated, occupied, defended, or controlled squares that affect checks, escapes, and recaptures.

WHY IT WORKS

Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route.

RECOGNITION CUES

Use with knight forks, king hunts, pawn races, and deflections.

BOUNDARY

Do not track every square; focus on those connected to the line's purpose.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0176 | MODULE 06 OF 10 | CORE ADVICE

Track Critical Squares - The Rule

COACH'S INSTRUCTION

During a line, note newly vacated, occupied, defended, or controlled squares that affect checks, escapes, and recaptures.

WHY IT IS LOGICALLY TRUE

Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route.

USE IT WHEN

Use with knight forks, king hunts, pawn races, and deflections.

BOUNDARY / FAILURE MODE

Do not track every square; focus on those connected to the line's purpose.

QUESTION AT THE BOARD

Which square changes function in this variation?

PRACTICAL DRILL

Annotate ten combinations with a single "critical square" and explain its role at each ply.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0177 | MODULE 06 OF 10 | RECOGNITION

Track Critical Squares - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use with knight forks, king hunts, pawn races, and deflections.

WHY IT IS LOGICALLY TRUE

Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Do not track every square; focus on those connected to the line's purpose.

QUESTION AT THE BOARD

Which square changes function in this variation?

PRACTICAL DRILL

Recognition drill: Annotate ten combinations with a single "critical square" and explain its role at each ply. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

Track Critical Squares - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Which square changes function in this variation?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: During a line, note newly vacated, occupied, defended, or controlled squares that affect checks, escapes, and recaptures.

WHY IT IS LOGICALLY TRUE

Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use with knight forks, king hunts, pawn races, and deflections.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Do not track every square; focus on those connected to the line's purpose.

QUESTION AT THE BOARD

Which square changes function in this variation?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0179 | MODULE 06 OF 10 | EXCEPTIONS

Track Critical Squares - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Do not track every square; focus on those connected to the line's purpose.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route.

USE IT WHEN

Use the normal rule under these conditions: Use with knight forks, king hunts, pawn races, and deflections. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Annotate ten combinations with a single "critical square" and explain its role at each ply. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

Track Critical Squares - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: During a line, note newly vacated, occupied, defended, or controlled squares that affect checks, escapes, and recaptures.

WHY IT IS LOGICALLY TRUE

Tactics are often square stories rather than piece stories. One vacated square can create a fork, mating net, or promotion route. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Do not track every square; focus on those connected to the line's purpose.

QUESTION AT THE BOARD

Which square changes function in this variation?

PRACTICAL DRILL

Annotate ten combinations with a single "critical square" and explain its role at each ply. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0181-0185

Use Branch Pruning with Reasons

CORE INSTRUCTION

Stop analyzing a branch when it is illegal, clearly inferior, forced into a known endpoint, or dominated by another line.

WHY IT WORKS

Reasoned pruning saves time without turning into wishful avoidance. It also lets you reconstruct why a line was dismissed.

RECOGNITION CUES

Use when a position has many replies or transpositions.

BOUNDARY

Never prune merely because a defense is unpleasant or surprising.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0181 | MODULE 07 OF 10 | CORE ADVICE

Use Branch Pruning with Reasons - The Rule

COACH'S INSTRUCTION

Stop analyzing a branch when it is illegal, clearly inferior, forced into a known endpoint, or dominated by another line.

WHY IT IS LOGICALLY TRUE

Reasoned pruning saves time without turning into wishful avoidance. It also lets you reconstruct why a line was dismissed.

USE IT WHEN

Use when a position has many replies or transpositions.

BOUNDARY / FAILURE MODE

Never prune merely because a defense is unpleasant or surprising.

QUESTION AT THE BOARD

What fact justifies ending this branch?

PRACTICAL DRILL

Analyze five complex positions with a tree diagram and label every pruned branch with its reason.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0182 | MODULE 07 OF 10 | RECOGNITION

Use Branch Pruning with Reasons - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when a position has many replies or transpositions.

WHY IT IS LOGICALLY TRUE

Reasoned pruning saves time without turning into wishful avoidance. It also lets you reconstruct why a line was dismissed. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

Analyze five complex positions with a tree diagram and label every pruned branch with its reason. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0186-0190

Verify Move Order

CORE INSTRUCTION

When two useful moves are available, test whether changing the order permits a defense, creates a tempo, or alters a recapture.

WHY IT WORKS

Chess is sequential. Identical ingredients can produce different results because the opponent receives an intervening move.

RECOGNITION CUES

Use for combinations, pawn breaks, batteries, and development with threats.

BOUNDARY

In quiet positions orders may transpose, but confirm that castling rights, en passant, and tactical details are unchanged.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0186 | MODULE 08 OF 10 | CORE ADVICE

Verify Move Order - The Rule

COACH'S INSTRUCTION

When two useful moves are available, test whether changing the order permits a defense, creates a tempo, or alters a recapture.

WHY IT IS LOGICALLY TRUE

Chess is sequential. Identical ingredients can produce different results because the opponent receives an intervening move.

USE IT WHEN

Use for combinations, pawn breaks, batteries, and development with threats.

BOUNDARY / FAILURE MODE

In quiet positions orders may transpose, but confirm that castling rights, en passant, and tactical details are unchanged.

QUESTION AT THE BOARD

Why must this move come first?

PRACTICAL DRILL

Find ten tactical examples and deliberately reverse the first two moves; write the new defensive resource.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0187 | MODULE 08 OF 10 | RECOGNITION

Verify Move Order - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for combinations, pawn breaks, batteries, and development with threats.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0191-0195

Recalculate After a Surprise

CORE INSTRUCTION

When the opponent deviates, discard the old line and rebuild from the actual board.

WHY IT WORKS

Continuing a memorized or imagined variation after the position changes produces illegal and irrelevant analysis.

RECOGNITION CUES

Use after unexpected defenses, intermediate moves, or different recaptures.

BOUNDARY

If the move transposes exactly, reuse the evaluation only after confirming all state details.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0191 | MODULE 09 OF 10 | CORE ADVICE

Recalculate After a Surprise - The Rule

COACH'S INSTRUCTION

When the opponent deviates, discard the old line and rebuild from the actual board.

WHY IT IS LOGICALLY TRUE

Continuing a memorized or imagined variation after the position changes produces illegal and irrelevant analysis.

USE IT WHEN

Use after unexpected defenses, intermediate moves, or different recaptures.

BOUNDARY / FAILURE MODE

If the move transposes exactly, reuse the evaluation only after confirming all state details.

QUESTION AT THE BOARD

Which assumption in my previous line is no longer true?

PRACTICAL DRILL

Play training positions against a partner or engine that deliberately chooses second-best but surprising replies.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0192 | MODULE 09 OF 10 | RECOGNITION

Recalculate After a Surprise - How to Notice It

COACH'S INSTRUCTION

FIVE-PART MODULE | ADVICE 0196-0200

State the Final Evaluation in Words

CORE INSTRUCTION

At the endpoint, name the material balance, king safety, activity, structure, and next plan.

WHY IT WORKS

Verbal evaluation exposes missing factors and makes candidate comparison possible. "Looks good" cannot be audited or remembered.

RECOGNITION CUES

Use after every main branch in slow analysis.

BOUNDARY

In time pressure, compress the statement to one decisive factor.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0196 | MODULE 10 OF 10 | CORE ADVICE

State the Final Evaluation in Words - The Rule

COACH'S INSTRUCTION

At the endpoint, name the material balance, king safety, activity, structure, and next plan.

WHY IT IS LOGICALLY TRUE

Verbal evaluation exposes missing factors and makes candidate comparison possible. "Looks good" cannot be audited or remembered.

USE IT WHEN

Use after every main branch in slow analysis.

BOUNDARY / FAILURE MODE

In time pressure, compress the statement to one decisive factor.

QUESTION AT THE BOARD

What concrete feature makes this endpoint preferable?

PRACTICAL DRILL

After solving each puzzle, write a two-sentence endpoint evaluation even when the tactic wins material.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0197 | MODULE 10 OF 10 | RECOGNITION

State the Final Evaluation in Words - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after every main branch in slow analysis.

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: In time pressure, compress the statement to one decisive factor.

QUESTION AT THE BOARD

What concrete feature makes this endpoint preferable?

PRACTICAL DRILL

After solving each puzzle, write a two-sentence endpoint evaluation even when the tactic wins material. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

RETRIEVAL TEST

Can you coach yourself through all ten modules?

01 Calculate Forcing Lines First

Which branch can force the position to clarify fastest?

02 Visualize One Move at a Time

What changed on the board after this one move?

03 Make the Opponent Difficult

What reply would I least like to face?

04 Stop at a Stable Endpoint

Has the tactical storm ended enough to evaluate honestly?

05 Count Before and After

What exactly was exchanged, and what remains?

06 Track Critical Squares

Which square changes function in this variation?

07 Use Branch Pruning with Reasons

What fact justifies ending this branch?

08 Verify Move Order

Why must this move come first?

09 Recalculate After a Surprise

Which assumption in my previous line is no longer true?

10 State the Final Evaluation in Words

What concrete feature makes this endpoint preferable?

Pass standard: state the core advice, explain the causal reason, name one exception, and apply the board question to a fresh position.
