Endgame Practical Wisdom

Use exact knowledge and disciplined conversion

INSIDE THIS VOLUME

50

coaching lessons

10

five-part modules

66

phone-friendly pages

Original teaching synthesis: practical advice, logical reasons, limits, board questions, and drills.

THE COACH-IN-YOUR-EAR METHOD

Advice becomes strength only when you can retrieve and apply it.

1. LEARN THE CAUSAL CHAIN

Read the instruction, then explain why it should work. If you cannot connect board feature to move and consequence, you have memorized a slogan rather than learned a tool.

2. USE ALL FIVE LESSONS

Each module separates the core rule, recognition cues, an over-the-board routine, limits and exceptions, and a training habit. Study the set as one skill.

3. RETRIEVE FROM A POSITION

Hide the page, set up a board, and answer the board question before choosing a move. Recognition under uncertainty is the bridge from reading to playing.

4. VERIFY CONCRETE CHESS

Advice organizes attention; it never overrules legality, tactics, or exact calculation. Test the opponent's strongest forcing reply before acting.

5. SPACE THE REVIEWS

Review the module after 1, 3, 7, 14, and 30 days. Mark it learned only when you can state the idea, its boundary, and a real game example without looking.

These are original synthesized lessons, not quotations attributed to any particular grandmaster. The course distills widely established chess reasoning into a practical curriculum.

MODULES 1-5

Volume roadmap

MODULE 01 | ADVICE 0701-0705 | PAGE 5

Activate the King Early

Centralize the king as soon as mating danger and tactical checks no longer dominate.

MODULE 02 | ADVICE 0706-0710 | PAGE 11

Calculate Pawn Races to Promotion

Count exact moves, captures, checks, and promotion tempi rather than relying on distance.

MODULE 03 | ADVICE 0711-0715 | PAGE 17

Preserve Reserve Tempi

Avoid unnecessary pawn moves that may later decide opposition or zugzwang.

MODULE 04 | ADVICE 0716-0720 | PAGE 23

Put Rooks Behind Passed Pawns

Place the rook behind your passer to push it, or behind the enemy passer to restrain it when geometry allows.

MODULE 05 | ADVICE 0721-0725 | PAGE 29

Keep the Rook Active

Prefer checking distance, attacks on pawns, and king restriction over passive pawn defense.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

MODULES 6-10

Volume roadmap

MODULE 06 | ADVICE 0726-0730 | PAGE 35

Do Not Rush Passed Pawns

Improve king and piece placement before pushing when the pawn can be blockaded.

MODULE 07 | ADVICE 0731-0735 | PAGE 41

Trade into Pawn Endings Only After Counting

Calculate king entry, opposition, races, and reserve tempi before exchanging the last piece.

MODULE 08 | ADVICE 0736-0740 | PAGE 47

Create Two Weaknesses

When one target is fully defended, create a second on the other wing.

MODULE 09 | ADVICE 0741-0745 | PAGE 53

Use the Principle of Two Results

When winning is uncertain, preserve the win without allowing a loss through unnecessary risk.

MODULE 10 | ADVICE 0746-0750 | PAGE 59

Know the Essential Theoretical Positions

Master basic mates, key pawn endings, Lucena, Philidor, and common minor-piece rules.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

FIVE-PART MODULE | ADVICE 0701-0705

Activate the King Early

CORE INSTRUCTION

Centralize the king as soon as mating danger and tactical checks no longer dominate.

WHY IT WORKS

The king becomes a strong short-range piece and saves critical tempi in simplified positions.

RECOGNITION CUES

Use as queens and attacking material disappear.

BOUNDARY

Rook and queen activity can still punish exposure.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0701 | MODULE 01 OF 10 | CORE ADVICE

Activate the King Early - The Rule

COACH'S INSTRUCTION

Centralize the king as soon as mating danger and tactical checks no longer dominate.

WHY IT IS LOGICALLY TRUE

The king becomes a strong short-range piece and saves critical tempi in simplified positions.

USE IT WHEN

Use as queens and attacking material disappear.

BOUNDARY / FAILURE MODE

Rook and queen activity can still punish exposure.

QUESTION AT THE BOARD

Is my king still a liability, or has it become a piece?

PRACTICAL DRILL

Compare king routes in twenty simplified positions.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0702 | MODULE 01 OF 10 | RECOGNITION

Activate the King Early - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use as queens and attacking material disappear.

WHY IT IS LOGICALLY TRUE

The king becomes a strong short-range piece and saves critical tempi in simplified positions. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Rook and queen activity can still punish exposure.

QUESTION AT THE BOARD

Is my king still a liability, or has it become a piece?

PRACTICAL DRILL

Recognition drill: Compare king routes in twenty simplified positions. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0703 | MODULE 01 OF 10 | BOARD USE

Activate the King Early - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Is my king still a liability, or has it become a piece?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Centralize the king as soon as mating danger and tactical checks no longer dominate.

WHY IT IS LOGICALLY TRUE

The king becomes a strong short-range piece and saves critical tempi in simplified positions. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use as queens and attacking material disappear.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Rook and queen activity can still punish exposure.

QUESTION AT THE BOARD

Is my king still a liability, or has it become a piece?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0704 | MODULE 01 OF 10 | EXCEPTIONS

Activate the King Early - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Rook and queen activity can still punish exposure.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. The king becomes a strong short-range piece and saves critical tempi in simplified positions.

USE IT WHEN

Use the normal rule under these conditions: Use as queens and attacking material disappear. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Compare king routes in twenty simplified positions. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0705 | MODULE 01 OF 10 | TRAINING

Activate the King Early - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Centralize the king as soon as mating danger and tactical checks no longer dominate.

WHY IT IS LOGICALLY TRUE

The king becomes a strong short-range piece and saves critical tempi in simplified positions. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Rook and queen activity can still punish exposure.

QUESTION AT THE BOARD

Is my king still a liability, or has it become a piece?

PRACTICAL DRILL

Compare king routes in twenty simplified positions. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0706-0710

Calculate Pawn Races to Promotion

CORE INSTRUCTION

Count exact moves, captures, checks, and promotion tempi rather than relying on distance.

WHY IT WORKS

One check or diagonal capture can reverse the apparent race.

RECOGNITION CUES

Use whenever passers run on opposite wings.

BOUNDARY

General rules like the square are aids, not substitutes for exact counting.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0706 | MODULE 02 OF 10 | CORE ADVICE

Calculate Pawn Races to Promotion - The Rule

COACH'S INSTRUCTION

Count exact moves, captures, checks, and promotion tempi rather than relying on distance.

WHY IT IS LOGICALLY TRUE

One check or diagonal capture can reverse the apparent race.

USE IT WHEN

Use whenever passers run on opposite wings.

BOUNDARY / FAILURE MODE

General rules like the square are aids, not substitutes for exact counting.

QUESTION AT THE BOARD

Who promotes with check, and whose turn is it afterward?

PRACTICAL DRILL

Solve pawn races from both sides without moving pieces.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0707 | MODULE 02 OF 10 | RECOGNITION

Calculate Pawn Races to Promotion - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use whenever passers run on opposite wings.

WHY IT IS LOGICALLY TRUE

One check or diagonal capture can reverse the apparent race. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. General rules like the square are aids, not substitutes for exact counting.

QUESTION AT THE BOARD

Who promotes with check, and whose turn is it afterward?

PRACTICAL DRILL

Recognition drill: Solve pawn races from both sides without moving pieces. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0708 | MODULE 02 OF 10 | BOARD USE

Calculate Pawn Races to Promotion - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Who promotes with check, and whose turn is it afterward?'
Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Count exact moves, captures, checks, and promotion tempi rather than relying on distance.

WHY IT IS LOGICALLY TRUE

One check or diagonal capture can reverse the apparent race. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use whenever passers run on opposite wings.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. General rules like the square are aids, not substitutes for exact counting.

QUESTION AT THE BOARD

Who promotes with check, and whose turn is it afterward?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0709 | MODULE 02 OF 10 | EXCEPTIONS

Calculate Pawn Races to Promotion - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: General rules like the square are aids, not substitutes for exact counting.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. One check or diagonal capture can reverse the apparent race.

USE IT WHEN

Use the normal rule under these conditions: Use whenever passers run on opposite wings. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Solve pawn races from both sides without moving pieces. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0710 | MODULE 02 OF 10 | TRAINING

Calculate Pawn Races to Promotion - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Count exact moves, captures, checks, and promotion tempi rather than relying on distance.

WHY IT IS LOGICALLY TRUE

One check or diagonal capture can reverse the apparent race. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: General rules like the square are aids, not substitutes for exact counting.

QUESTION AT THE BOARD

Who promotes with check, and whose turn is it afterward?

PRACTICAL DRILL

Solve pawn races from both sides without moving pieces. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0711-0715

Preserve Reserve Tempi

CORE INSTRUCTION

Avoid unnecessary pawn moves that may later decide opposition or zugzwang.

WHY IT WORKS

In sparse positions, a spare move can transfer the obligation to move.

RECOGNITION CUES

Use in king-and-pawn endings.

BOUNDARY

A pawn move may be required to prevent a break or gain space.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0711 | MODULE 03 OF 10 | CORE ADVICE

Preserve Reserve Tempi - The Rule

COACH'S INSTRUCTION

Avoid unnecessary pawn moves that may later decide opposition or zugzwang.

WHY IT IS LOGICALLY TRUE

In sparse positions, a spare move can transfer the obligation to move.

USE IT WHEN

Use in king-and-pawn endings.

BOUNDARY / FAILURE MODE

A pawn move may be required to prevent a break or gain space.

QUESTION AT THE BOARD

Which pawn move can I save for later?

PRACTICAL DRILL

Set up opposition studies and list every available waiting move.

MEMORY HOOK | Name the reason before trusting the rule.

Preserve Reserve Tempi - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in king-and-pawn endings.

WHY IT IS LOGICALLY TRUE

In sparse positions, a spare move can transfer the obligation to move. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. A pawn move may be required to prevent a break or gain space.

QUESTION AT THE BOARD

Which pawn move can I save for later?

PRACTICAL DRILL

Recognition drill: Set up opposition studies and list every available waiting move. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

Preserve Reserve Tempi - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Which pawn move can I save for later?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Avoid unnecessary pawn moves that may later decide opposition or zugzwang.

WHY IT IS LOGICALLY TRUE

In sparse positions, a spare move can transfer the obligation to move. A short routine converts understanding into an action that survives clock pressure.

PRACTICAL DRILL

Set up opposition studies and list every available waiting move. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0716-0720

Put Rooks Behind Passed Pawns

CORE INSTRUCTION

Place the rook behind your passer to push it, or behind the enemy passer to restrain it when geometry allows.

WHY IT WORKS

A rook's checking and supporting range grows as the pawn advances.

RECOGNITION CUES

Use in rook endings.

BOUNDARY

Side checks, cutting off the king, or tactical activity can be more urgent.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0716 | MODULE 04 OF 10 | CORE ADVICE

Put Rooks Behind Passed Pawns - The Rule

COACH'S INSTRUCTION

Place the rook behind your passer to push it, or behind the enemy passer to restrain it when geometry allows.

WHY IT IS LOGICALLY TRUE

A rook's checking and supporting range grows as the pawn advances.

USE IT WHEN

Use in rook endings.

BOUNDARY / FAILURE MODE

Side checks, cutting off the king, or tactical activity can be more urgent.

QUESTION AT THE BOARD

Does "behind" create activity, or am I following a slogan blindly?

PRACTICAL DRILL

Analyze ten rook endings and compare behind, side, and front placements.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0717 | MODULE 04 OF 10 | RECOGNITION

Put Rooks Behind Passed Pawns - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in rook endings.

WHY IT IS LOGICALLY TRUE

A rook's checking and supporting range grows as the pawn advances. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Side checks, cutting off the king, or tactical activity can be more urgent.

QUESTION AT THE BOARD

Does "behind" create activity, or am I following a slogan blindly?

PRACTICAL DRILL

Recognition drill: Analyze ten rook endings and compare behind, side, and front placements. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0718 | MODULE 04 OF 10 | BOARD USE

Put Rooks Behind Passed Pawns - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Does "behind" create activity, or am I following a slogan blindly?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Place the rook behind your passer to push it, or behind the enemy passer to restrain it when geometry allows.

WHY IT IS LOGICALLY TRUE

A rook's checking and supporting range grows as the pawn advances. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in rook endings.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Side checks, cutting off the king, or tactical activity can be more urgent.

PRACTICAL DRILL

Analyze ten rook endings and compare behind, side, and front placements. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0721-0725

Keep the Rook Active

CORE INSTRUCTION

Prefer checking distance, attacks on pawns, and king restriction over passive pawn defense.

WHY IT WORKS

Rooks lose value when tied to one weakness; activity creates multiple problems.

RECOGNITION CUES

Use when defending worse rook endings.

BOUNDARY

Some known fortresses require exact passivity.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0721 | MODULE 05 OF 10 | CORE ADVICE

Keep the Rook Active - The Rule

COACH'S INSTRUCTION

Prefer checking distance, attacks on pawns, and king restriction over passive pawn defense.

WHY IT IS LOGICALLY TRUE

Rooks lose value when tied to one weakness; activity creates multiple problems.

USE IT WHEN

Use when defending worse rook endings.

BOUNDARY / FAILURE MODE

Some known fortresses require exact passivity.

QUESTION AT THE BOARD

Can my rook attack something while still controlling the passer?

PRACTICAL DRILL

Study active defensive rook moves and record the counterplay created.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0722 | MODULE 05 OF 10 | RECOGNITION

Keep the Rook Active - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when defending worse rook endings.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0726-0730

Do Not Rush Passed Pawns

CORE INSTRUCTION

Improve king and piece placement before pushing when the pawn can be blockaded.

WHY IT WORKS

Each advance may lose protection and give the blockader a fixed square.

RECOGNITION CUES

Use in technical endings.

BOUNDARY

A race or tactical moment may demand immediate advance.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0726 | MODULE 06 OF 10 | CORE ADVICE

Do Not Rush Passed Pawns - The Rule

COACH'S INSTRUCTION

Improve king and piece placement before pushing when the pawn can be blockaded.

WHY IT IS LOGICALLY TRUE

Each advance may lose protection and give the blockader a fixed square.

USE IT WHEN

Use in technical endings.

BOUNDARY / FAILURE MODE

A race or tactical moment may demand immediate advance.

QUESTION AT THE BOARD

What improves before the pawn crosses another rank?

PRACTICAL DRILL

Compare immediate and prepared pawn pushes in ten endings.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0727 | MODULE 06 OF 10 | RECOGNITION

Do Not Rush Passed Pawns - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in technical endings.

WHY IT IS LOGICALLY TRUE

Each advance may lose protection and give the blockader a fixed square. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. A race or tactical moment may demand immediate advance.

QUESTION AT THE BOARD

What improves before the pawn crosses another rank?

PRACTICAL DRILL

Recognition drill: Compare immediate and prepared pawn pushes in ten endings. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0728 | MODULE 06 OF 10 | BOARD USE

Do Not Rush Passed Pawns - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What improves before the pawn crosses another rank?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Improve king and piece placement before pushing when the pawn can be blockaded.

WHY IT IS LOGICALLY TRUE

Each advance may lose protection and give the blockader a fixed square. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in technical endings.

BOUNDARY / FAILURE MODE

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0729 | MODULE 06 OF 10 | EXCEPTIONS

Do Not Rush Passed Pawns - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: A race or tactical moment may demand immediate advance.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Each advance may lose protection and give the blockader a fixed square.

USE IT WHEN

Use the normal rule under these conditions: Use in technical endings. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Compare immediate and prepared pawn pushes in ten endings. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0730 | MODULE 06 OF 10 | TRAINING

Do Not Rush Passed Pawns - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Improve king and piece placement before pushing when the pawn can be blockaded.

WHY IT IS LOGICALLY TRUE

Each advance may lose protection and give the blockader a fixed square. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: A race or tactical moment may demand immediate advance.

QUESTION AT THE BOARD

What improves before the pawn crosses another rank?

PRACTICAL DRILL

Compare immediate and prepared pawn pushes in ten endings. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0731-0735

Trade into Pawn Endings Only After Counting

**CORE INSTRUCTION**

Calculate king entry, opposition, races, and reserve tempi before exchanging the last piece.

WHY IT WORKS

Pawn endings are concrete and irreversible; a pleasant-looking king can still lose by one tempo.

RECOGNITION CUES

Use before rook or minor-piece trades.

BOUNDARY

Known theoretical positions may be evaluated instantly only if remembered accurately.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0731 | MODULE 07 OF 10 | CORE ADVICE

Trade into Pawn Endings Only After Counting - The Rule

COACH'S INSTRUCTION

Calculate king entry, opposition, races, and reserve tempi before exchanging the last piece.

WHY IT IS LOGICALLY TRUE

Pawn endings are concrete and irreversible; a pleasant-looking king can still lose by one tempo.

USE IT WHEN

Use before rook or minor-piece trades.

BOUNDARY / FAILURE MODE

Known theoretical positions may be evaluated instantly only if remembered accurately.

QUESTION AT THE BOARD

What is the exact result after the final exchange?

PRACTICAL DRILL

Convert ten piece endings to pawn endings on a board and calculate to promotion.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0732 | MODULE 07 OF 10 | RECOGNITION

Trade into Pawn Endings Only After Counting - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use before rook or minor-piece trades.

WHY IT IS LOGICALLY TRUE

Pawn endings are concrete and irreversible; a pleasant-looking king can still lose by one tempo. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Known theoretical positions may be evaluated instantly only if remembered accurately.

QUESTION AT THE BOARD

What is the exact result after the final exchange?

PRACTICAL DRILL

Recognition drill: Convert ten piece endings to pawn endings on a board and calculate to promotion. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0733 | MODULE 07 OF 10 | BOARD USE

Trade into Pawn Endings Only After Counting - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What is the exact result after the final exchange?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Calculate king entry, opposition, races, and reserve tempi before exchanging the last piece.

WHY IT IS LOGICALLY TRUE

Pawn endings are concrete and irreversible; a pleasant-looking king can still lose by one tempo. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use before rook or minor-piece trades.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Known theoretical positions may be evaluated instantly only if remembered accurately.

QUESTION AT THE BOARD

What is the exact result after the final exchange?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0734 | MODULE 07 OF 10 | EXCEPTIONS

Trade into Pawn Endings Only After Counting - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Known theoretical positions may be evaluated instantly only if remembered accurately.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Pawn endings are concrete and irreversible; a pleasant-looking king can still lose by one tempo.

USE IT WHEN

Use the normal rule under these conditions: Use before rook or minor-piece trades. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

Convert ten piece endings to pawn endings on a board and calculate to promotion. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0736-0740

Create Two Weaknesses

CORE INSTRUCTION

When one target is fully defended, create a second on the other wing.

WHY IT WORKS

A defender's pieces cannot cover separated fronts efficiently.

RECOGNITION CUES

Use when converting a stable advantage.

BOUNDARY

Creating the second weakness must not release counterplay or weaken your king.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0736 | MODULE 08 OF 10 | CORE ADVICE

Create Two Weaknesses - The Rule

COACH'S INSTRUCTION

When one target is fully defended, create a second on the other wing.

WHY IT IS LOGICALLY TRUE

A defender's pieces cannot cover separated fronts efficiently.

USE IT WHEN

Use when converting a stable advantage.

BOUNDARY / FAILURE MODE

Creating the second weakness must not release counterplay or weaken your king.

QUESTION AT THE BOARD

Can the defender hold both targets with one setup?

PRACTICAL DRILL

Study technical wins and mark the moment the second weakness appears.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0737 | MODULE 08 OF 10 | RECOGNITION

Create Two Weaknesses - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when converting a stable advantage.

WHY IT IS LOGICALLY TRUE

A defender's pieces cannot cover separated fronts efficiently. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

FIVE-PART MODULE | ADVICE 0741-0745

Use the Principle of Two Results

CORE INSTRUCTION

When winning is uncertain, preserve the win without allowing a loss through unnecessary risk.

WHY IT WORKS

Endgame value includes outcome control; forcing the opponent to defend safely improves practical chances.

RECOGNITION CUES

Use with a small stable edge.

BOUNDARY

A tournament situation may rationally require greater risk.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0741 | MODULE 09 OF 10 | CORE ADVICE

Use the Principle of Two Results - The Rule

COACH'S INSTRUCTION

When winning is uncertain, preserve the win without allowing a loss through unnecessary risk.

WHY IT IS LOGICALLY TRUE

Endgame value includes outcome control; forcing the opponent to defend safely improves practical chances.

USE IT WHEN

Use with a small stable edge.

BOUNDARY / FAILURE MODE

A tournament situation may rationally require greater risk.

QUESTION AT THE BOARD

Does this move keep the position safe while asking a real question?

PRACTICAL DRILL

Play equal endings with the goal of pressing for twenty moves without creating counterplay.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0742 | MODULE 09 OF 10 | RECOGNITION

Use the Principle of Two Results - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use with a small stable edge.

FIVE-PART MODULE | ADVICE 0746-0750

Know the Essential Theoretical Positions

CORE INSTRUCTION

Master basic mates, key pawn endings, Lucena, Philidor, and common minor-piece rules.

WHY IT WORKS

Exact landmarks let you steer earlier positions with confidence and save clock time.

RECOGNITION CUES

Use as a permanent training foundation.

BOUNDARY

Memory must include conditions and exceptions, not labels alone.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0746 | MODULE 10 OF 10 | CORE ADVICE

Know the Essential Theoretical Positions - The Rule

COACH'S INSTRUCTION

Master basic mates, key pawn endings, Lucena, Philidor, and common minor-piece rules.

WHY IT IS LOGICALLY TRUE

Exact landmarks let you steer earlier positions with confidence and save clock time.

USE IT WHEN

Use as a permanent training foundation.

BOUNDARY / FAILURE MODE

Memory must include conditions and exceptions, not labels alone.

QUESTION AT THE BOARD

Which known position am I trying to reach or avoid?

PRACTICAL DRILL

Maintain a rotating deck of twenty core endings and test from both sides monthly.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0747 | MODULE 10 OF 10 | RECOGNITION

Know the Essential Theoretical Positions - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use as a permanent training foundation.

MEMORY HOOK | What you retrieve is what you can use.

RETRIEVAL TEST

Can you coach yourself through all ten modules?

01 Activate the King Early

Is my king still a liability, or has it become a piece?

02 Calculate Pawn Races to Promotion

Who promotes with check, and whose turn is it afterward?

03 Preserve Reserve Tempi

Which pawn move can I save for later?

04 Put Rooks Behind Passed Pawns

Does "behind" create activity, or am I following a slogan blindly?

05 Keep the Rook Active

Can my rook attack something while still controlling the passer?

06 Do Not Rush Passed Pawns

What improves before the pawn crosses another rank?

07 Trade into Pawn Endings Only After Counting

What is the exact result after the final exchange?

08 Create Two Weaknesses

Can the defender hold both targets with one setup?

09 Use the Principle of Two Results

Does this move keep the position safe while asking a real question?

10 Know the Essential Theoretical Positions

Which known position am I trying to reach or avoid?

Pass standard: state the core advice, explain the causal reason, name one exception, and apply the board question to a fresh position.
