Game Analysis and Error Diagnosis

Turn every serious game into a precise lesson

INSIDE THIS VOLUME

50

coaching lessons

10

five-part modules

66

phone-friendly pages

Original teaching synthesis: practical advice, logical reasons, limits, board questions, and drills.

THE COACH-IN-YOUR-EAR METHOD

Advice becomes strength only when you can retrieve and apply it.

1. LEARN THE CAUSAL CHAIN

Read the instruction, then explain why it should work. If you cannot connect board feature to move and consequence, you have memorized a slogan rather than learned a tool.

2. USE ALL FIVE LESSONS

Each module separates the core rule, recognition cues, an over-the-board routine, limits and exceptions, and a training habit. Study the set as one skill.

3. RETRIEVE FROM A POSITION

Hide the page, set up a board, and answer the board question before choosing a move. Recognition under uncertainty is the bridge from reading to playing.

4. VERIFY CONCRETE CHESS

Advice organizes attention; it never overrules legality, tactics, or exact calculation. Test the opponent's strongest forcing reply before acting.

5. SPACE THE REVIEWS

Review the module after 1, 3, 7, 14, and 30 days. Mark it learned only when you can state the idea, its boundary, and a real game example without looking.

These are original synthesized lessons, not quotations attributed to any particular grandmaster. The course distills widely established chess reasoning into a practical curriculum.

MODULES 1-5

Volume roadmap

MODULE 01 | ADVICE 0851-0855 | PAGE 5

Analyze Without an Engine First

Reconstruct your candidates, evaluation, and clock use before asking a computer.

MODULE 02 | ADVICE 0856-0860 | PAGE 11

Find the First Important Divergence

Locate the earliest move where your plan, evaluation, or candidate set became meaningfully worse.

MODULE 03 | ADVICE 0861-0865 | PAGE 17

Separate Tactical from Process Errors

Classify missed move, visualization failure, evaluation error, knowledge gap, and time error separately.

MODULE 04 | ADVICE 0866-0870 | PAGE 23

Record Discarded Candidates

Note strong moves you considered and rejected, plus the reason.

MODULE 05 | ADVICE 0871-0875 | PAGE 29

Review the Opponent's Best Chances

Analyze moments where their move could have been stronger, not only your mistakes.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

MODULES 6-10

Volume roadmap

MODULE 06 | ADVICE 0876-0880 | PAGE 35

Attach a Fix to Every Error

Convert diagnosis into a board question, pattern set, endgame drill, or repertoire repair.

MODULE 07 | ADVICE 0881-0885 | PAGE 41

Use the Engine as a Verifier

Ask the engine specific questions about candidates, tactics, and evaluations instead of accepting the top line passively.

MODULE 08 | ADVICE 0886-0890 | PAGE 47

Analyze Wins as Seriously as Losses

Look for unsound choices, missed conversions, and lucky escapes in successful games.

MODULE 09 | ADVICE 0891-0895 | PAGE 53

Build a Personal Error Profile

Count recurring causes, phases, structures, and clock conditions across games.

MODULE 10 | ADVICE 0896-0900 | PAGE 59

Revisit the Game After Delay

Return after several days and test key positions without notes.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

FIVE-PART MODULE | ADVICE 0851-0855

Analyze Without an Engine First

CORE INSTRUCTION

Reconstruct your candidates, evaluation, and clock use before asking a computer.

WHY IT WORKS

Unaided review exposes the thinking process that produced the move.

RECOGNITION CUES

Use after every serious game.

BOUNDARY

Tactical verification with an engine is valuable after your own account exists.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0851 | MODULE 01 OF 10 | CORE ADVICE

Analyze Without an Engine First - The Rule

COACH'S INSTRUCTION

Reconstruct your candidates, evaluation, and clock use before asking a computer.

WHY IT IS LOGICALLY TRUE

Unaided review exposes the thinking process that produced the move.

USE IT WHEN

Use after every serious game.

BOUNDARY / FAILURE MODE

Tactical verification with an engine is valuable after your own account exists.

QUESTION AT THE BOARD

What did I actually see and believe at the board?

PRACTICAL DRILL

Annotate all long thinks and evaluation changes before turning on analysis.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0852 | MODULE 01 OF 10 | RECOGNITION

Analyze Without an Engine First - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after every serious game.

WHY IT IS LOGICALLY TRUE

Unaided review exposes the thinking process that produced the move. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Tactical verification with an engine is valuable after your own account exists.

QUESTION AT THE BOARD

What did I actually see and believe at the board?

PRACTICAL DRILL

Recognition drill: Annotate all long thinks and evaluation changes before turning on analysis. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0853 | MODULE 01 OF 10 | BOARD USE

Analyze Without an Engine First - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What did I actually see and believe at the board?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Reconstruct your candidates, evaluation, and clock use before asking a computer.

WHY IT IS LOGICALLY TRUE

Unaided review exposes the thinking process that produced the move. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use after every serious game.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Tactical verification with an engine is valuable after your own account exists.

QUESTION AT THE BOARD

What did I actually see and believe at the board?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0854 | MODULE 01 OF 10 | EXCEPTIONS

Analyze Without an Engine First - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Tactical verification with an engine is valuable after your own account exists.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Unaided review exposes the thinking process that produced the move.

USE IT WHEN

Use the normal rule under these conditions: Use after every serious game. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Annotate all long thinks and evaluation changes before turning on analysis. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0855 | MODULE 01 OF 10 | TRAINING

Analyze Without an Engine First - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Reconstruct your candidates, evaluation, and clock use before asking a computer.

WHY IT IS LOGICALLY TRUE

Unaided review exposes the thinking process that produced the move. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Tactical verification with an engine is valuable after your own account exists.

QUESTION AT THE BOARD

What did I actually see and believe at the board?

PRACTICAL DRILL

Annotate all long thinks and evaluation changes before turning on analysis. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0856-0860

Find the First Important Divergence

CORE INSTRUCTION

Locate the earliest move where your plan, evaluation, or candidate set became meaningfully worse.

WHY IT WORKS

Later blunders may be symptoms of an earlier misunderstanding.

RECOGNITION CUES

Use when a game contains many errors.

BOUNDARY

A single late tactical blunder can still be the true cause.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0856 | MODULE 02 OF 10 | CORE ADVICE

Find the First Important Divergence - The Rule

COACH'S INSTRUCTION

Locate the earliest move where your plan, evaluation, or candidate set became meaningfully worse.

WHY IT IS LOGICALLY TRUE

Later blunders may be symptoms of an earlier misunderstanding.

USE IT WHEN

Use when a game contains many errors.

BOUNDARY / FAILURE MODE

A single late tactical blunder can still be the true cause.

QUESTION AT THE BOARD

When did the position first become hard for the wrong reason?

PRACTICAL DRILL

Review losses backward, then verify the earliest actionable decision forward.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0857 | MODULE 02 OF 10 | RECOGNITION

Find the First Important Divergence - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when a game contains many errors.

WHY IT IS LOGICALLY TRUE

Later blunders may be symptoms of an earlier misunderstanding. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. A single late tactical blunder can still be the true cause.

QUESTION AT THE BOARD

When did the position first become hard for the wrong reason?

PRACTICAL DRILL

Recognition drill: Review losses backward, then verify the earliest actionable decision forward. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0858 | MODULE 02 OF 10 | BOARD USE

Find the First Important Divergence - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'When did the position first become hard for the wrong reason?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Locate the earliest move where your plan, evaluation, or candidate set became meaningfully worse.

WHY IT IS LOGICALLY TRUE

Later blunders may be symptoms of an earlier misunderstanding. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use when a game contains many errors.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. A single late tactical blunder can still be the true cause.

QUESTION AT THE BOARD

When did the position first become hard for the wrong reason?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0859 | MODULE 02 OF 10 | EXCEPTIONS

Find the First Important Divergence - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: A single late tactical blunder can still be the true cause.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Later blunders may be symptoms of an earlier misunderstanding.

USE IT WHEN

Use the normal rule under these conditions: Use when a game contains many errors. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Review losses backward, then verify the earliest actionable decision forward. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0860 | MODULE 02 OF 10 | TRAINING

Find the First Important Divergence - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Locate the earliest move where your plan, evaluation, or candidate set became meaningfully worse.

WHY IT IS LOGICALLY TRUE

Later blunders may be symptoms of an earlier misunderstanding. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: A single late tactical blunder can still be the true cause.

QUESTION AT THE BOARD

When did the position first become hard for the wrong reason?

PRACTICAL DRILL

Review losses backward, then verify the earliest actionable decision forward. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0861-0865

Separate Tactical from Process Errors

CORE INSTRUCTION

Classify missed move, visualization failure, evaluation error, knowledge gap, and time error separately.

WHY IT WORKS

Different causes require different training.

RECOGNITION CUES

Use for every serious mistake.

BOUNDARY

One move can have multiple causes; identify the earliest preventable one.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0861 | MODULE 03 OF 10 | CORE ADVICE

Separate Tactical from Process Errors - The Rule

COACH'S INSTRUCTION

Classify missed move, visualization failure, evaluation error, knowledge gap, and time error separately.

WHY IT IS LOGICALLY TRUE

Different causes require different training.

USE IT WHEN

Use for every serious mistake.

BOUNDARY / FAILURE MODE

One move can have multiple causes; identify the earliest preventable one.

QUESTION AT THE BOARD

What question or skill would have prevented this error?

PRACTICAL DRILL

Maintain an error ledger with cause, trigger, and corrective drill.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0862 | MODULE 03 OF 10 | RECOGNITION

Separate Tactical from Process Errors - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for every serious mistake.

WHY IT IS LOGICALLY TRUE

Different causes require different training. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. One move can have multiple causes; identify the earliest preventable one.

QUESTION AT THE BOARD

What question or skill would have prevented this error?

PRACTICAL DRILL

Recognition drill: Maintain an error ledger with cause, trigger, and corrective drill. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0863 | MODULE 03 OF 10 | BOARD USE

Separate Tactical from Process Errors - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What question or skill would have prevented this error?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Classify missed move, visualization failure, evaluation error, knowledge gap, and time error separately.

WHY IT IS LOGICALLY TRUE

Different causes require different training. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use for every serious mistake.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. One move can have multiple causes; identify the earliest preventable one.

QUESTION AT THE BOARD

What question or skill would have prevented this error?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0864 | MODULE 03 OF 10 | EXCEPTIONS

Separate Tactical from Process Errors - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: One move can have multiple causes; identify the earliest preventable one.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Different causes require different training.

USE IT WHEN

Use the normal rule under these conditions: Use for every serious mistake. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

Separate Tactical from Process Errors - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Classify missed move, visualization failure, evaluation error, knowledge gap, and time error separately.

WHY IT IS LOGICALLY TRUE

Different causes require different training. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: One move can have multiple causes; identify the earliest preventable one.

QUESTION AT THE BOARD

What question or skill would have prevented this error?

PRACTICAL DRILL

Maintain an error ledger with cause, trigger, and corrective drill. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0866-0870

Record Discarded Candidates

CORE INSTRUCTION

Note strong moves you considered and rejected, plus the reason.

WHY IT WORKS

Rejection errors reveal evaluation bias that engine move lists cannot show.

RECOGNITION CUES

Use around critical decisions.

BOUNDARY

Do not invent false memories; mark uncertainty honestly.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0866 | MODULE 04 OF 10 | CORE ADVICE

Record Discarded Candidates - The Rule

COACH'S INSTRUCTION

Note strong moves you considered and rejected, plus the reason.

WHY IT IS LOGICALLY TRUE

Rejection errors reveal evaluation bias that engine move lists cannot show.

USE IT WHEN

Use around critical decisions.

BOUNDARY / FAILURE MODE

Do not invent false memories; mark uncertainty honestly.

QUESTION AT THE BOARD

Why did I abandon the move that later proved best?

PRACTICAL DRILL

After games, reconstruct candidate lists before checking the score or engine.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0867 | MODULE 04 OF 10 | RECOGNITION

Record Discarded Candidates - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use around critical decisions.

WHY IT IS LOGICALLY TRUE

Rejection errors reveal evaluation bias that engine move lists cannot show. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Do not invent false memories; mark uncertainty honestly.

QUESTION AT THE BOARD

Why did I abandon the move that later proved best?

PRACTICAL DRILL

Recognition drill: After games, reconstruct candidate lists before checking the score or engine. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0868 | MODULE 04 OF 10 | BOARD USE

Record Discarded Candidates - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Why did I abandon the move that later proved best?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Note strong moves you considered and rejected, plus the reason.

WHY IT IS LOGICALLY TRUE

Rejection errors reveal evaluation bias that engine move lists cannot show. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use around critical decisions.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Do not invent false memories; mark uncertainty honestly.

PRACTICAL DRILL

After games, reconstruct candidate lists before checking the score or engine. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0871-0875

Review the Opponent's Best Chances

CORE INSTRUCTION

Analyze moments where their move could have been stronger, not only your mistakes.

WHY IT WORKS

Your decision may have been unsound even if it went unpunished.

RECOGNITION CUES

Use in wins and draws.

BOUNDARY

Avoid spending hours on irrelevant side lines; focus on consequential chances.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0871 | MODULE 05 OF 10 | CORE ADVICE

Review the Opponent's Best Chances - The Rule

COACH'S INSTRUCTION

Analyze moments where their move could have been stronger, not only your mistakes.

WHY IT IS LOGICALLY TRUE

Your decision may have been unsound even if it went unpunished.

USE IT WHEN

Use in wins and draws.

BOUNDARY / FAILURE MODE

Avoid spending hours on irrelevant side lines; focus on consequential chances.

QUESTION AT THE BOARD

What would a stronger opponent have done here?

PRACTICAL DRILL

In each win, identify at least one missed defensive or tactical resource for the opponent.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0872 | MODULE 05 OF 10 | RECOGNITION

Review the Opponent's Best Chances - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in wins and draws.

WHY IT IS LOGICALLY TRUE

Your decision may have been unsound even if it went unpunished. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Avoid spending hours on irrelevant side lines; focus on consequential chances.

QUESTION AT THE BOARD

What would a stronger opponent have done here?

PRACTICAL DRILL

Recognition drill: In each win, identify at least one missed defensive or tactical resource for the opponent. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0873 | MODULE 05 OF 10 | BOARD USE

Review the Opponent's Best Chances - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What would a stronger opponent have done here?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Analyze moments where their move could have been stronger, not only your mistakes.

WHY IT IS LOGICALLY TRUE

Your decision may have been unsound even if it went unpunished. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in wins and draws.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Avoid spending hours on irrelevant side lines; focus on consequential chances.

QUESTION AT THE BOARD

What would a stronger opponent have done here?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0874 | MODULE 05 OF 10 | EXCEPTIONS

Review the Opponent's Best Chances - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Avoid spending hours on irrelevant side lines; focus on consequential chances.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Your decision may have been unsound even if it went unpunished.

USE IT WHEN

Use the normal rule under these conditions: Use in wins and draws. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: In each win, identify at least one missed defensive or tactical resource for the opponent. Then create or find one contrasting position where the normal advice fails, and explain why.

ADVICE 0875 | MODULE 05 OF 10 | TRAINING

Review the Opponent's Best Chances - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Analyze moments where their move could have been stronger, not only your mistakes.

WHY IT IS LOGICALLY TRUE

Your decision may have been unsound even if it went unpunished. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Avoid spending hours on irrelevant side lines; focus on consequential chances.

QUESTION AT THE BOARD

What would a stronger opponent have done here?

PRACTICAL DRILL

In each win, identify at least one missed defensive or tactical resource for the opponent. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0876-0880

Attach a Fix to Every Error

CORE INSTRUCTION

Convert diagnosis into a board question, pattern set, endgame drill, or repertoire repair.

WHY IT WORKS

Insight without retrieval practice rarely changes future behavior.

RECOGNITION CUES

Use at the end of analysis.

BOUNDARY

Some rare mistakes need only awareness, not a large training project.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0876 | MODULE 06 OF 10 | CORE ADVICE

Attach a Fix to Every Error - The Rule

COACH'S INSTRUCTION

Convert diagnosis into a board question, pattern set, endgame drill, or repertoire repair.

WHY IT IS LOGICALLY TRUE

Insight without retrieval practice rarely changes future behavior.

USE IT WHEN

Use at the end of analysis.

BOUNDARY / FAILURE MODE

Some rare mistakes need only awareness, not a large training project.

QUESTION AT THE BOARD

What will I do differently when this trigger appears again?

PRACTICAL DRILL

Create one corrective exercise from each analyzed game.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0877 | MODULE 06 OF 10 | RECOGNITION

Attach a Fix to Every Error - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use at the end of analysis.

WHY IT IS LOGICALLY TRUE

Insight without retrieval practice rarely changes future behavior. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Some rare mistakes need only awareness, not a large training project.

QUESTION AT THE BOARD

What will I do differently when this trigger appears again?

PRACTICAL DRILL

Recognition drill: Create one corrective exercise from each analyzed game. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0878 | MODULE 06 OF 10 | BOARD USE

Attach a Fix to Every Error - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What will I do differently when this trigger appears again?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Convert diagnosis into a board question, pattern set, endgame drill, or repertoire repair.

WHY IT IS LOGICALLY TRUE

Insight without retrieval practice rarely changes future behavior. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use at the end of analysis.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Some rare mistakes need only awareness, not a large training project.

QUESTION AT THE BOARD

What will I do differently when this trigger appears again?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0879 | MODULE 06 OF 10 | EXCEPTIONS

Attach a Fix to Every Error - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Some rare mistakes need only awareness, not a large training project.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Insight without retrieval practice rarely changes future behavior.

USE IT WHEN

Use the normal rule under these conditions: Use at the end of analysis. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Create one corrective exercise from each analyzed game. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0880 | MODULE 06 OF 10 | TRAINING

Attach a Fix to Every Error - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Convert diagnosis into a board question, pattern set, endgame drill, or repertoire repair.

WHY IT IS LOGICALLY TRUE

Insight without retrieval practice rarely changes future behavior. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Some rare mistakes need only awareness, not a large training project.

QUESTION AT THE BOARD

What will I do differently when this trigger appears again?

PRACTICAL DRILL

Create one corrective exercise from each analyzed game. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0881-0885

Use the Engine as a Verifier

CORE INSTRUCTION

Ask the engine specific questions about candidates, tactics, and evaluations instead of accepting the top line passively.

WHY IT WORKS

Directed use preserves human understanding while leveraging tactical accuracy.

RECOGNITION CUES

Use after unaided analysis.

BOUNDARY

Some positions need deeper engine exploration or tablebases.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0881 | MODULE 07 OF 10 | CORE ADVICE

Use the Engine as a Verifier - The Rule

COACH'S INSTRUCTION

Ask the engine specific questions about candidates, tactics, and evaluations instead of accepting the top line passively.

WHY IT IS LOGICALLY TRUE

Directed use preserves human understanding while leveraging tactical accuracy.

USE IT WHEN

Use after unaided analysis.

BOUNDARY / FAILURE MODE

Some positions need deeper engine exploration or tablebases.

QUESTION AT THE BOARD

Which belief am I testing with the engine?

PRACTICAL DRILL

Write a hypothesis before each engine click and record whether it was confirmed.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0882 | MODULE 07 OF 10 | RECOGNITION

Use the Engine as a Verifier - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after unaided analysis.

WHY IT IS LOGICALLY TRUE

Directed use preserves human understanding while leveraging tactical accuracy. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Some positions need deeper engine exploration or tablebases.

QUESTION AT THE BOARD

Which belief am I testing with the engine?

PRACTICAL DRILL

Recognition drill: Write a hypothesis before each engine click and record whether it was confirmed. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0883 | MODULE 07 OF 10 | BOARD USE

Use the Engine as a Verifier - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Which belief am I testing with the engine?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Ask the engine specific questions about candidates, tactics, and evaluations instead of accepting the top line passively.

WHY IT IS LOGICALLY TRUE

Directed use preserves human understanding while leveraging tactical accuracy. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use after unaided analysis.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Some positions need deeper engine exploration or tablebases.

QUESTION AT THE BOARD

Which belief am I testing with the engine?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0884 | MODULE 07 OF 10 | EXCEPTIONS

Use the Engine as a Verifier - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Some positions need deeper engine exploration or tablebases.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Directed use preserves human understanding while leveraging tactical accuracy.

USE IT WHEN

Use the normal rule under these conditions: Use after unaided analysis. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Write a hypothesis before each engine click and record whether it was confirmed. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0885 | MODULE 07 OF 10 | TRAINING

Use the Engine as a Verifier - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Ask the engine specific questions about candidates, tactics, and evaluations instead of accepting the top line passively.

WHY IT IS LOGICALLY TRUE

Directed use preserves human understanding while leveraging tactical accuracy. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Some positions need deeper engine exploration or tablebases.

QUESTION AT THE BOARD

Which belief am I testing with the engine?

PRACTICAL DRILL

Write a hypothesis before each engine click and record whether it was confirmed. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0886-0890

Analyze Wins as Seriously as Losses

CORE INSTRUCTION

Look for unsound choices, missed conversions, and lucky escapes in successful games.

WHY IT WORKS

The result can hide faulty processes that will fail against stronger resistance.

RECOGNITION CUES

Use routinely, not only after defeats.

BOUNDARY

Prioritize instructive moments if time is limited.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0886 | MODULE 08 OF 10 | CORE ADVICE

Analyze Wins as Seriously as Losses - The Rule

COACH'S INSTRUCTION

Look for unsound choices, missed conversions, and lucky escapes in successful games.

WHY IT IS LOGICALLY TRUE

The result can hide faulty processes that will fail against stronger resistance.

USE IT WHEN

Use routinely, not only after defeats.

BOUNDARY / FAILURE MODE

Prioritize instructive moments if time is limited.

QUESTION AT THE BOARD

Which decision would I not want to repeat despite winning?

PRACTICAL DRILL

Select the most uncomfortable moment from every win and analyze it deeply.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0887 | MODULE 08 OF 10 | RECOGNITION

Analyze Wins as Seriously as Losses - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use routinely, not only after defeats.

WHY IT IS LOGICALLY TRUE

The result can hide faulty processes that will fail against stronger resistance. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Prioritize instructive moments if time is limited.

QUESTION AT THE BOARD

Which decision would I not want to repeat despite winning?

PRACTICAL DRILL

Recognition drill: Select the most uncomfortable moment from every win and analyze it deeply. Name the cue before calculating the answer.

FIVE-PART MODULE | ADVICE 0891-0895

Build a Personal Error Profile

CORE INSTRUCTION

Count recurring causes, phases, structures, and clock conditions across games.

WHY IT WORKS

Improvement accelerates when training targets your actual bottleneck.

RECOGNITION CUES

Use after a sample of at least ten serious games.

BOUNDARY

Small samples can mislead; update the profile over time.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0891 | MODULE 09 OF 10 | CORE ADVICE

Build a Personal Error Profile - The Rule

COACH'S INSTRUCTION

Count recurring causes, phases, structures, and clock conditions across games.

WHY IT IS LOGICALLY TRUE

Improvement accelerates when training targets your actual bottleneck.

USE IT WHEN

Use after a sample of at least ten serious games.

BOUNDARY / FAILURE MODE

Small samples can mislead; update the profile over time.

QUESTION AT THE BOARD

Which error family costs me the most points?

PRACTICAL DRILL

Summarize the ledger monthly and choose one priority for the next cycle.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0892 | MODULE 09 OF 10 | RECOGNITION

Build a Personal Error Profile - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after a sample of at least ten serious games.

WHY IT IS LOGICALLY TRUE

Improvement accelerates when training targets your actual bottleneck. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

FIVE-PART MODULE | ADVICE 0896-0900

Revisit the Game After Delay

CORE INSTRUCTION

Return after several days and test key positions without notes.

WHY IT WORKS

Spacing reveals whether the lesson was learned and reduces emotional distortion.

RECOGNITION CUES

Use for the most instructive games.

BOUNDARY

Immediate review is still needed to capture thought process.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0896 | MODULE 10 OF 10 | CORE ADVICE

Revisit the Game After Delay - The Rule

COACH'S INSTRUCTION

Return after several days and test key positions without notes.

WHY IT IS LOGICALLY TRUE

Spacing reveals whether the lesson was learned and reduces emotional distortion.

USE IT WHEN

Use for the most instructive games.

BOUNDARY / FAILURE MODE

Immediate review is still needed to capture thought process.

QUESTION AT THE BOARD

Can I now find the move and explain why?

PRACTICAL DRILL

Retest three key positions after 3, 7, and 30 days.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0897 | MODULE 10 OF 10 | RECOGNITION

Revisit the Game After Delay - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for the most instructive games.

WHY IT IS LOGICALLY TRUE

Spacing reveals whether the lesson was learned and reduces emotional distortion. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0900 | MODULE 10 OF 10 | TRAINING

Revisit the Game After Delay - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Return after several days and test key positions without notes.

WHY IT IS LOGICALLY TRUE

Spacing reveals whether the lesson was learned and reduces emotional distortion. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Immediate review is still needed to capture thought process.

QUESTION AT THE BOARD

Can I now find the move and explain why?

PRACTICAL DRILL

Retest three key positions after 3, 7, and 30 days. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

RETRIEVAL TEST

Can you coach yourself through all ten modules?

01 Analyze Without an Engine First

What did I actually see and believe at the board?

02 Find the First Important Divergence

When did the position first become hard for the wrong reason?

03 Separate Tactical from Process Errors

What question or skill would have prevented this error?

04 Record Discarded Candidates

Why did I abandon the move that later proved best?

05 Review the Opponent's Best Chances

What would a stronger opponent have done here?

06 Attach a Fix to Every Error

What will I do differently when this trigger appears again?

07 Use the Engine as a Verifier

Which belief am I testing with the engine?

08 Analyze Wins as Seriously as Losses

Which decision would I not want to repeat despite winning?

09 Build a Personal Error Profile

Which error family costs me the most points?

10 Revisit the Game After Delay

Can I now find the move and explain why?

Pass standard: state the core advice, explain the causal reason, name one exception, and apply the board question to a fresh position.

COMPLETION TEST

Choose a fresh position. Without notes, identify the main problem, recall the relevant advice, state its limit, generate candidates, and test the opponent's best reply. Date the volume only when the method appears naturally in slow games.
