

Training Design and Skill Transfer

Study so that knowledge appears during games

50

coaching lessons

10

five-part modules

66

phone-friendly pages

Original teaching synthesis: practical advice, logical reasons, limits, board questions, and drills.

THE COACH-IN-YOUR-EAR METHOD

Advice becomes strength only when you can retrieve and apply it.

1. LEARN THE CAUSAL CHAIN

Read the instruction, then explain why it should work. If you cannot connect board feature to move and consequence, you have memorized a slogan rather than learned a tool.

2. USE ALL FIVE LESSONS

Each module separates the core rule, recognition cues, an over-the-board routine, limits and exceptions, and a training habit. Study the set as one skill.

3. RETRIEVE FROM A POSITION

Hide the page, set up a board, and answer the board question before choosing a move. Recognition under uncertainty is the bridge from reading to playing.

4. VERIFY CONCRETE CHESS

Advice organizes attention; it never overrules legality, tactics, or exact calculation. Test the opponent's strongest forcing reply before acting.

5. SPACE THE REVIEWS

Review the module after 1, 3, 7, 14, and 30 days. Mark it learned only when you can state the idea, its boundary, and a real game example without looking.

These are original synthesized lessons, not quotations attributed to any particular grandmaster. The course distills widely established chess reasoning into a practical curriculum.

MODULES 1-5

Volume roadmap

MODULE 01 | ADVICE 0901-0905 | PAGE 5

Train Your Largest Bottleneck

Choose the skill whose improvement would save the most points now.

MODULE 02 | ADVICE 0906-0910 | PAGE 11

Balance Knowledge with Slow Games

Pair study with serious play where the idea must be retrieved under decision pressure.

MODULE 03 | ADVICE 0911-0915 | PAGE 17

Use Spaced Retrieval

Revisit positions after increasing intervals and produce the move and reason from memory.

MODULE 04 | ADVICE 0916-0920 | PAGE 23

Interleave Related Skills

Mix tactics, calculation, endings, and strategic decisions rather than blocking only one obvious pattern.

MODULE 05 | ADVICE 0921-0925 | PAGE 29

Train Explanation as Well as Move Choice

State why the move works, the opponent's best reply, and the resulting plan.

The searchable MASTER_ADVICE_INDEX.csv and MASTER_ADVICE_INDEX.html list every individual lesson across all twenty volumes.

MODULES 6-10

Volume roadmap

MODULE 06 | ADVICE 0926-0930 | PAGE 35

Use Representative Positions

Select positions that capture recurring structures and decisions rather than only spectacular exceptions.

MODULE 07 | ADVICE 0931-0935 | PAGE 41

Calibrate Difficulty

Work on tasks that demand effort but still allow meaningful calculation and feedback.

MODULE 08 | ADVICE 0936-0940 | PAGE 47

Review Errors More Than Correct Guesses

Spend extra time on wrong reasoning and lucky answers.

MODULE 09 | ADVICE 0941-0945 | PAGE 53

Measure Transfer, Not Hours

Track blunder rate, time use, recall, endgame results, and decision quality in games.

MODULE 10 | ADVICE 0946-0950 | PAGE 59

Protect Consistency with a Minimum Session

Define a small routine you can complete on low-energy days.

The searchable [MASTER_ADVICE_INDEX.csv](#) and [MASTER_ADVICE_INDEX.html](#) list every individual lesson across all twenty volumes.

FIVE-PART MODULE | ADVICE 0901-0905

Train Your Largest Bottleneck

CORE INSTRUCTION

Choose the skill whose improvement would save the most points now.

WHY IT WORKS

Progress is constrained by the weakest high-frequency component, not the most interesting topic.

RECOGNITION CUES

Use at the start of each training cycle.

BOUNDARY

Maintain other skills lightly to avoid decay.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0901 | MODULE 01 OF 10 | CORE ADVICE

Train Your Largest Bottleneck - The Rule

COACH'S INSTRUCTION

Choose the skill whose improvement would save the most points now.

WHY IT IS LOGICALLY TRUE

Progress is constrained by the weakest high-frequency component, not the most interesting topic.

USE IT WHEN

Use at the start of each training cycle.

BOUNDARY / FAILURE MODE

Maintain other skills lightly to avoid decay.

QUESTION AT THE BOARD

What error repeats often and changes results?

PRACTICAL DRILL

Use a twenty-game ledger to select one six-week priority.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0902 | MODULE 01 OF 10 | RECOGNITION

Train Your Largest Bottleneck - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use at the start of each training cycle.

WHY IT IS LOGICALLY TRUE

Progress is constrained by the weakest high-frequency component, not the most interesting topic. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Maintain other skills lightly to avoid decay.

QUESTION AT THE BOARD

What error repeats often and changes results?

PRACTICAL DRILL

Recognition drill: Use a twenty-game ledger to select one six-week priority. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0903 | MODULE 01 OF 10 | BOARD USE

Train Your Largest Bottleneck - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What error repeats often and changes results?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Choose the skill whose improvement would save the most points now.

WHY IT IS LOGICALLY TRUE

Progress is constrained by the weakest high-frequency component, not the most interesting topic. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use at the start of each training cycle.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Maintain other skills lightly to avoid decay.

QUESTION AT THE BOARD

What error repeats often and changes results?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0904 | MODULE 01 OF 10 | EXCEPTIONS

Train Your Largest Bottleneck - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Maintain other skills lightly to avoid decay.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Progress is constrained by the weakest high-frequency component, not the most interesting topic.

USE IT WHEN

Use the normal rule under these conditions: Use at the start of each training cycle. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Use a twenty-game ledger to select one six-week priority. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0905 | MODULE 01 OF 10 | TRAINING

Train Your Largest Bottleneck - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Choose the skill whose improvement would save the most points now.

WHY IT IS LOGICALLY TRUE

Progress is constrained by the weakest high-frequency component, not the most interesting topic. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Maintain other skills lightly to avoid decay.

QUESTION AT THE BOARD

What error repeats often and changes results?

PRACTICAL DRILL

Use a twenty-game ledger to select one six-week priority. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0906-0910

Balance Knowledge with Slow Games

CORE INSTRUCTION

Pair study with serious play where the idea must be retrieved under decision pressure.

WHY IT WORKS

Transfer requires context, uncertainty, and consequences.

RECOGNITION CUES

Use every week.

BOUNDARY

More study may be needed temporarily when a foundation is missing.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0906 | MODULE 02 OF 10 | CORE ADVICE

Balance Knowledge with Slow Games - The Rule

COACH'S INSTRUCTION

Pair study with serious play where the idea must be retrieved under decision pressure.

WHY IT IS LOGICALLY TRUE

Transfer requires context, uncertainty, and consequences.

USE IT WHEN

Use every week.

BOUNDARY / FAILURE MODE

More study may be needed temporarily when a foundation is missing.

QUESTION AT THE BOARD

Where will I test this idea in an actual decision?

PRACTICAL DRILL

For every hour of instruction, schedule a slow game or deep position exercise.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0907 | MODULE 02 OF 10 | RECOGNITION

Balance Knowledge with Slow Games - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use every week.

WHY IT IS LOGICALLY TRUE

Transfer requires context, uncertainty, and consequences. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. More study may be needed temporarily when a foundation is missing.

QUESTION AT THE BOARD

Where will I test this idea in an actual decision?

PRACTICAL DRILL

Recognition drill: For every hour of instruction, schedule a slow game or deep position exercise. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0908 | MODULE 02 OF 10 | BOARD USE

Balance Knowledge with Slow Games - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Where will I test this idea in an actual decision?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Pair study with serious play where the idea must be retrieved under decision pressure.

WHY IT IS LOGICALLY TRUE

Transfer requires context, uncertainty, and consequences. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use every week.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. More study may be needed temporarily when a foundation is missing.

QUESTION AT THE BOARD

Where will I test this idea in an actual decision?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0909 | MODULE 02 OF 10 | EXCEPTIONS

Balance Knowledge with Slow Games - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: More study may be needed temporarily when a foundation is missing.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Transfer requires context, uncertainty, and consequences.

USE IT WHEN

Use the normal rule under these conditions: Use every week. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: For every hour of instruction, schedule a slow game or deep position exercise. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0910 | MODULE 02 OF 10 | TRAINING

Balance Knowledge with Slow Games - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Pair study with serious play where the idea must be retrieved under decision pressure.

WHY IT IS LOGICALLY TRUE

Transfer requires context, uncertainty, and consequences. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: More study may be needed temporarily when a foundation is missing.

QUESTION AT THE BOARD

Where will I test this idea in an actual decision?

PRACTICAL DRILL

For every hour of instruction, schedule a slow game or deep position exercise. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0911-0915

Use Spaced Retrieval

CORE INSTRUCTION

Revisit positions after increasing intervals and produce the move and reason from memory.

WHY IT WORKS

Retrieval strengthens access far more than rereading.

RECOGNITION CUES

Use for openings, endings, tactics, and principles.

BOUNDARY

Failed recall should trigger brief correction before the next test.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0911 | MODULE 03 OF 10 | CORE ADVICE

Use Spaced Retrieval - The Rule

COACH'S INSTRUCTION

Revisit positions after increasing intervals and produce the move and reason from memory.

WHY IT IS LOGICALLY TRUE

Retrieval strengthens access far more than rereading.

USE IT WHEN

Use for openings, endings, tactics, and principles.

BOUNDARY / FAILURE MODE

Failed recall should trigger brief correction before the next test.

QUESTION AT THE BOARD

Can I reconstruct this without hints?

PRACTICAL DRILL

Review after 1, 3, 7, 14, and 30 days.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0912 | MODULE 03 OF 10 | RECOGNITION

Use Spaced Retrieval - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use for openings, endings, tactics, and principles.

WHY IT IS LOGICALLY TRUE

Retrieval strengthens access far more than rereading. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Failed recall should trigger brief correction before the next test.

QUESTION AT THE BOARD

Can I reconstruct this without hints?

PRACTICAL DRILL

Recognition drill: Review after 1, 3, 7, 14, and 30 days. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0913 | MODULE 03 OF 10 | BOARD USE

Use Spaced Retrieval - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Can I reconstruct this without hints?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Revisit positions after increasing intervals and produce the move and reason from memory.

WHY IT IS LOGICALLY TRUE

Retrieval strengthens access far more than rereading. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use for openings, endings, tactics, and principles.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Failed recall should trigger brief correction before the next test.

QUESTION AT THE BOARD

Can I reconstruct this without hints?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0914 | MODULE 03 OF 10 | EXCEPTIONS

Use Spaced Retrieval - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Failed recall should trigger brief correction before the next test.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Retrieval strengthens access far more than rereading.

USE IT WHEN

Use the normal rule under these conditions: Use for openings, endings, tactics, and principles. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Review after 1, 3, 7, 14, and 30 days. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

Use Spaced Retrieval - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Revisit positions after increasing intervals and produce the move and reason from memory.

PRACTICAL DRILL

Review after 1, 3, 7, 14, and 30 days. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0916-0920

Interleave Related Skills

CORE INSTRUCTION

Mix tactics, calculation, endings, and strategic decisions rather than blocking only one obvious pattern.

WHY IT WORKS

Interleaving trains recognition of which method applies.

RECOGNITION CUES

Use after basic pattern familiarity exists.

BOUNDARY

Beginners may need short blocked sets before mixing.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0916 | MODULE 04 OF 10 | CORE ADVICE

Interleave Related Skills - The Rule

COACH'S INSTRUCTION

Mix tactics, calculation, endings, and strategic decisions rather than blocking only one obvious pattern.

WHY IT IS LOGICALLY TRUE

Interleaving trains recognition of which method applies.

USE IT WHEN

Use after basic pattern familiarity exists.

BOUNDARY / FAILURE MODE

Beginners may need short blocked sets before mixing.

QUESTION AT THE BOARD

Can I identify the problem type before solving it?

PRACTICAL DRILL

Create mixed sets of twenty positions with hidden themes.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0917 | MODULE 04 OF 10 | RECOGNITION

Interleave Related Skills - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after basic pattern familiarity exists.

WHY IT IS LOGICALLY TRUE

Interleaving trains recognition of which method applies. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Beginners may need short blocked sets before mixing.

QUESTION AT THE BOARD

Can I identify the problem type before solving it?

PRACTICAL DRILL

Recognition drill: Create mixed sets of twenty positions with hidden themes. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0918 | MODULE 04 OF 10 | BOARD USE

Interleave Related Skills - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Can I identify the problem type before solving it?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Mix tactics, calculation, endings, and strategic decisions rather than blocking only one obvious pattern.

WHY IT IS LOGICALLY TRUE

Interleaving trains recognition of which method applies. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use after basic pattern familiarity exists.

PRACTICAL DRILL

Create mixed sets of twenty positions with hidden themes. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0921-0925

Train Explanation as Well as Move Choice

CORE INSTRUCTION

State why the move works, the opponent's best reply, and the resulting plan.

WHY IT WORKS

Explanation exposes guessing and builds transferable models.

RECOGNITION CUES

Use in all non-speed training.

BOUNDARY

Some exact tactical patterns need fast recognition too.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0921 | MODULE 05 OF 10 | CORE ADVICE

Train Explanation as Well as Move Choice - The Rule

COACH'S INSTRUCTION

State why the move works, the opponent's best reply, and the resulting plan.

WHY IT IS LOGICALLY TRUE

Explanation exposes guessing and builds transferable models.

USE IT WHEN

Use in all non-speed training.

BOUNDARY / FAILURE MODE

Some exact tactical patterns need fast recognition too.

QUESTION AT THE BOARD

Could I teach this position without naming the answer?

PRACTICAL DRILL

Record a one-minute spoken explanation after each difficult exercise.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0922 | MODULE 05 OF 10 | RECOGNITION

Train Explanation as Well as Move Choice - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use in all non-speed training.

WHY IT IS LOGICALLY TRUE

Explanation exposes guessing and builds transferable models. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Some exact tactical patterns need fast recognition too.

QUESTION AT THE BOARD

Could I teach this position without naming the answer?

PRACTICAL DRILL

Recognition drill: Record a one-minute spoken explanation after each difficult exercise. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0923 | MODULE 05 OF 10 | BOARD USE

Train Explanation as Well as Move Choice - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Could I teach this position without naming the answer?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: State why the move works, the opponent's best reply, and the resulting plan.

WHY IT IS LOGICALLY TRUE

Explanation exposes guessing and builds transferable models. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use in all non-speed training.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Some exact tactical patterns need fast recognition too.

QUESTION AT THE BOARD

Could I teach this position without naming the answer?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0924 | MODULE 05 OF 10 | EXCEPTIONS

Train Explanation as Well as Move Choice - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Some exact tactical patterns need fast recognition too.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Explanation exposes guessing and builds transferable models.

USE IT WHEN

Use the normal rule under these conditions: Use in all non-speed training. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Record a one-minute spoken explanation after each difficult exercise. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0925 | MODULE 05 OF 10 | TRAINING

Train Explanation as Well as Move Choice - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: State why the move works, the opponent's best reply, and the resulting plan.

WHY IT IS LOGICALLY TRUE

Explanation exposes guessing and builds transferable models. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Some exact tactical patterns need fast recognition too.

QUESTION AT THE BOARD

Could I teach this position without naming the answer?

PRACTICAL DRILL

Record a one-minute spoken explanation after each difficult exercise. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0926-0930

Use Representative Positions

CORE INSTRUCTION

Select positions that capture recurring structures and decisions rather than only spectacular exceptions.

WHY IT WORKS

High-frequency patterns create the greatest transfer per hour.

RECOGNITION CUES

Use when building study sets.

BOUNDARY

Rare but catastrophic traps may still deserve a small place.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0926 | MODULE 06 OF 10 | CORE ADVICE

Use Representative Positions - The Rule

COACH'S INSTRUCTION

Select positions that capture recurring structures and decisions rather than only spectacular exceptions.

WHY IT IS LOGICALLY TRUE

High-frequency patterns create the greatest transfer per hour.

USE IT WHEN

Use when building study sets.

BOUNDARY / FAILURE MODE

Rare but catastrophic traps may still deserve a small place.

QUESTION AT THE BOARD

How often will this position type occur in my games?

PRACTICAL DRILL

Build a fifty-position set from your own recurring openings and endings.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0927 | MODULE 06 OF 10 | RECOGNITION

Use Representative Positions - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when building study sets.

WHY IT IS LOGICALLY TRUE

High-frequency patterns create the greatest transfer per hour. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Rare but catastrophic traps may still deserve a small place.

QUESTION AT THE BOARD

How often will this position type occur in my games?

PRACTICAL DRILL

Build a fifty-position set from your own recurring openings and endings. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0931-0935

Calibrate Difficulty

CORE INSTRUCTION

Work on tasks that demand effort but still allow meaningful calculation and feedback.

WHY IT WORKS

Problems far below level automate little; problems far above level encourage guessing.

RECOGNITION CUES

Use when selecting puzzles and books.

BOUNDARY

Occasional stretch problems develop endurance.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0931 | MODULE 07 OF 10 | CORE ADVICE

Calibrate Difficulty - The Rule

COACH'S INSTRUCTION

Work on tasks that demand effort but still allow meaningful calculation and feedback.

WHY IT IS LOGICALLY TRUE

Problems far below level automate little; problems far above level encourage guessing.

USE IT WHEN

Use when selecting puzzles and books.

BOUNDARY / FAILURE MODE

Occasional stretch problems develop endurance.

QUESTION AT THE BOARD

Am I solving, learning, or merely staring?

PRACTICAL DRILL

Track success rate and target a range that produces frequent but informative errors.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0932 | MODULE 07 OF 10 | RECOGNITION

Calibrate Difficulty - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use when selecting puzzles and books.

WHY IT IS LOGICALLY TRUE

Problems far below level automate little; problems far above level encourage guessing. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Occasional stretch problems develop endurance.

QUESTION AT THE BOARD

Am I solving, learning, or merely staring?

PRACTICAL DRILL

Recognition drill: Track success rate and target a range that produces frequent but informative errors. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0933 | MODULE 07 OF 10 | BOARD USE

Calibrate Difficulty - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Am I solving, learning, or merely staring?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Work on tasks that demand effort but still allow meaningful calculation and feedback.

WHY IT IS LOGICALLY TRUE

Problems far below level automate little; problems far above level encourage guessing. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use when selecting puzzles and books.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Occasional stretch problems develop endurance.

QUESTION AT THE BOARD

Am I solving, learning, or merely staring?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0934 | MODULE 07 OF 10 | EXCEPTIONS

Calibrate Difficulty - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Occasional stretch problems develop endurance.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Problems far below level automate little; problems far above level encourage guessing.

USE IT WHEN

Use the normal rule under these conditions: Use when selecting puzzles and books. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Track success rate and target a range that produces frequent but informative errors. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0935 | MODULE 07 OF 10 | TRAINING

Calibrate Difficulty - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Work on tasks that demand effort but still allow meaningful calculation and feedback.

WHY IT IS LOGICALLY TRUE

Problems far below level automate little; problems far above level encourage guessing. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Occasional stretch problems develop endurance.

QUESTION AT THE BOARD

Am I solving, learning, or merely staring?

PRACTICAL DRILL

Track success rate and target a range that produces frequent but informative errors. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0936-0940

Review Errors More Than Correct Guesses

CORE INSTRUCTION

Spend extra time on wrong reasoning and lucky answers.

WHY IT WORKS

The learning signal lies in the gap between your process and the position's demands.

RECOGNITION CUES

Use after every exercise set.

BOUNDARY

Correct solutions with excellent reasoning still deserve spaced review.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0936 | MODULE 08 OF 10 | CORE ADVICE

Review Errors More Than Correct Guesses - The Rule

COACH'S INSTRUCTION

Spend extra time on wrong reasoning and lucky answers.

WHY IT IS LOGICALLY TRUE

The learning signal lies in the gap between your process and the position's demands.

USE IT WHEN

Use after every exercise set.

BOUNDARY / FAILURE MODE

Correct solutions with excellent reasoning still deserve spaced review.

QUESTION AT THE BOARD

Why was my answer wrong or unjustified?

PRACTICAL DRILL

Keep a retry queue containing every miss and every low-confidence success.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0937 | MODULE 08 OF 10 | RECOGNITION

Review Errors More Than Correct Guesses - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use after every exercise set.

WHY IT IS LOGICALLY TRUE

The learning signal lies in the gap between your process and the position's demands. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Correct solutions with excellent reasoning still deserve spaced review.

QUESTION AT THE BOARD

Why was my answer wrong or unjustified?

PRACTICAL DRILL

Recognition drill: Keep a retry queue containing every miss and every low-confidence success. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0938 | MODULE 08 OF 10 | BOARD USE

Review Errors More Than Correct Guesses - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'Why was my answer wrong or unjustified?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Spend extra time on wrong reasoning and lucky answers.

WHY IT IS LOGICALLY TRUE

The learning signal lies in the gap between your process and the position's demands. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use after every exercise set.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Correct solutions with excellent reasoning still deserve spaced review.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Correct solutions with excellent reasoning still deserve spaced review.

QUESTION AT THE BOARD

Why was my answer wrong or unjustified?

PRACTICAL DRILL

Keep a retry queue containing every miss and every low-confidence success. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

Time spent is an input; changed behavior is the outcome.

ADVICE 0941 | MODULE 09 OF 10 | CORE ADVICE

Measure Transfer, Not Hours - The Rule

COACH'S INSTRUCTION

Track blunder rate, time use, recall, endgame results, and decision quality in games.

WHY IT IS LOGICALLY TRUE

Time spent is an input; changed behavior is the outcome.

USE IT WHEN

Use monthly.

BOUNDARY / FAILURE MODE

Rating changes lag and contain noise, so use several measures.

QUESTION AT THE BOARD

What can I now do in games that I could not do before?

PRACTICAL DRILL

Create a monthly dashboard with three process metrics and one result metric.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0942 | MODULE 09 OF 10 | RECOGNITION

Measure Transfer, Not Hours - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use monthly.

WHY IT IS LOGICALLY TRUE

Time spent is an input; changed behavior is the outcome. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Rating changes lag and contain noise, so use several measures.

PRACTICAL DRILL

Create a monthly dashboard with three process metrics and one result metric. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

FIVE-PART MODULE | ADVICE 0946-0950

Protect Consistency with a Minimum Session

CORE INSTRUCTION

Define a small routine you can complete on low-energy days.

WHY IT WORKS

Continuity preserves retrieval and prevents all-or-nothing training.

RECOGNITION CUES

Use during difficult weeks.

BOUNDARY

Rest is sometimes more valuable than forced study.

NEXT: five separate lessons turn this idea into an over-the-board habit.

ADVICE 0946 | MODULE 10 OF 10 | CORE ADVICE

Protect Consistency with a Minimum Session - The Rule

COACH'S INSTRUCTION

Define a small routine you can complete on low-energy days.

WHY IT IS LOGICALLY TRUE

Continuity preserves retrieval and prevents all-or-nothing training.

USE IT WHEN

Use during difficult weeks.

BOUNDARY / FAILURE MODE

Rest is sometimes more valuable than forced study.

QUESTION AT THE BOARD

What is the smallest useful session today?

PRACTICAL DRILL

Use a fifteen-minute minimum: five tactics, one key position, one review note.

MEMORY HOOK | Name the reason before trusting the rule.

ADVICE 0947 | MODULE 10 OF 10 | RECOGNITION

Protect Consistency with a Minimum Session - How to Notice It

COACH'S INSTRUCTION

Look for this trigger cluster before choosing a move: Use during difficult weeks.

WHY IT IS LOGICALLY TRUE

Continuity preserves retrieval and prevents all-or-nothing training. Recognition is the gateway: advice noticed only after the game cannot guide the decision.

USE IT WHEN

Run the cue scan after the opponent's move and again when your evaluation changes or no candidate feels convincing.

BOUNDARY / FAILURE MODE

A cue starts an investigation; it does not prove a move. Rest is sometimes more valuable than forced study.

PRACTICAL DRILL

Recognition drill: Use a fifteen-minute minimum: five tactics, one key position, one review note. Name the cue before calculating the answer.

MEMORY HOOK | Cue first; candidate second; proof last.

ADVICE 0948 | MODULE 10 OF 10 | BOARD USE

Protect Consistency with a Minimum Session - Use It at the Board

COACH'S INSTRUCTION

Use a three-step board routine: ask 'What is the smallest useful session today?' Generate two serious candidates, then test each against the opponent's best forcing reply. Apply this instruction: Define a small routine you can complete on low-energy days.

WHY IT IS LOGICALLY TRUE

Continuity preserves retrieval and prevents all-or-nothing training. A short routine converts understanding into an action that survives clock pressure.

USE IT WHEN

Use the routine when these conditions appear: Use during difficult weeks.

BOUNDARY / FAILURE MODE

Do not execute the routine mechanically if the position is forced. Rest is sometimes more valuable than forced study.

QUESTION AT THE BOARD

What is the smallest useful session today?

PRACTICAL DRILL

During one slow game, mark each moment this module appears. Record your candidates, the best reply you tested, and the endpoint you preferred.

MEMORY HOOK | Question -> candidates -> best reply -> endpoint.

ADVICE 0949 | MODULE 10 OF 10 | EXCEPTIONS

Protect Consistency with a Minimum Session - Know When to Break It

COACH'S INSTRUCTION

Treat the advice as conditional, not as a commandment. Its main boundary is: Rest is sometimes more valuable than forced study.

WHY IT IS LOGICALLY TRUE

Good principles compress experience, but concrete geometry decides the move. Continuity preserves retrieval and prevents all-or-nothing training.

USE IT WHEN

Use the normal rule under these conditions: Use during difficult weeks. Break it only when a calculated variation or clear contextual fact justifies the exception.

BOUNDARY / FAILURE MODE

An exception is not a feeling. State the tactical line, timing fact, or resulting position that makes the normal advice inferior.

QUESTION AT THE BOARD

What exact feature would justify breaking this advice here?

PRACTICAL DRILL

Exception drill: Use a fifteen-minute minimum: five tactics, one key position, one review note. Then create or find one contrasting position where the normal advice fails, and explain why.

MEMORY HOOK | Principles guide attention; concrete chess decides.

ADVICE 0950 | MODULE 10 OF 10 | TRAINING

Protect Consistency with a Minimum Session - Make It Automatic

COACH'S INSTRUCTION

Turn this instruction into a retrievable habit: Define a small routine you can complete on low-energy days.

WHY IT IS LOGICALLY TRUE

Continuity preserves retrieval and prevents all-or-nothing training. Spaced recall and position practice make the idea available during a real game instead of merely familiar on the page.

USE IT WHEN

Train first without a clock, then with a generous limit, and finally inside slow games where the theme is not announced.

BOUNDARY / FAILURE MODE

Accuracy comes before speed. Also preserve the idea's boundary: Rest is sometimes more valuable than forced study.

QUESTION AT THE BOARD

What is the smallest useful session today?

PRACTICAL DRILL

Use a fifteen-minute minimum: five tactics, one key position, one review note. Retest the same skill after 1, 3, 7, 14, and 30 days; require both the move and the explanation.

MEMORY HOOK | What you retrieve is what you can use.

RETRIEVAL TEST

Can you coach yourself through all ten modules?

01 Train Your Largest Bottleneck

What error repeats often and changes results?

02 Balance Knowledge with Slow Games

Where will I test this idea in an actual decision?

03 Use Spaced Retrieval

Can I reconstruct this without hints?

04 Interleave Related Skills

Can I identify the problem type before solving it?

05 Train Explanation as Well as Move Choice

Could I teach this position without naming the answer?

06 Use Representative Positions

How often will this position type occur in my games?

07 Calibrate Difficulty

Am I solving, learning, or merely staring?

08 Review Errors More Than Correct Guesses

Why was my answer wrong or unjustified?

09 Measure Transfer, Not Hours

What can I now do in games that I could not do before?

10 Protect Consistency with a Minimum Session

What is the smallest useful session today?

Pass standard: state the core advice, explain the causal reason, name one exception, and apply the board question to a fresh position.
