

An integrated move-order map, training cycle, and method for repairing the repertoire from real games.

6

12

30

You will leave with a coherent White system, clear branches for Black's major setups, and a sustainable way to deepen theory.

LEARN THE STRUCTURE, THEN THE LINE

A four-pass method for a theory-heavy opening

1. DECODE THE POSITION

Read the board before the moves. Name the center, each side's break, the worst piece, the king-safety difference, and the race clock.

2. UNDERSTAND THE CAUSAL CHAIN

Every recommendation connects a cue to a reason and a consequence. If you know only the move, you do not yet know the opening.

3. PLAY THE DECISION

Generate White's candidates, find Black's strongest reply, and choose the resulting structure you understand. The move is the end of the reasoning, not the beginning.

4. RETRIEVE UNDER PRESSURE

Cover the answer key, reconstruct the line, and speak the memory rule. Review after 1, 3, 7, 14, and 30 days, then test the idea in a slow game.

THEORY WARNING

This is a durable concept-first repertoire, not a claim to be a live engine database. Before tournament use, verify sharp forcing branches in Fritz or a current database.

Priority order at the board: legality and tactical survival, king safety, forcing moves, central transformation, activity, structure, then the remembered rule.

SIX LINKED LESSONS

Recognition first, execution second

You will leave with a coherent White system, clear branches for Black's major setups, and a sustainable way to deepen theory.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The main attacking rehearsal

WHY THIS POSITION MATTERS

The classical rehearsal links e5 space, Re1, h4, Nf1-h2-g4, and Bf4 or Qe2 into one plan while Black races with ...f6 and queenside expansion.

DECISION RULE

Which move is essential to the position, and which familiar move can be omitted because Black changed the threat?

SIDE TO MOVE

White

BLACK'S COUNTERPLAY

Black identifies the slowest part of White's buildup and strikes in the center or on the queenside before every attacker arrives.

WHITE'S PLAN

White preserves the causal order: secure the center, route pieces, create a hook, then open a line with enough force.

MEMORY RULE | Store the causal chain, not the diagram: center, route, hook, contact, entry.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

The classical rehearsal links e5 space, Re1, h4, Nf1-h2-g4, and Bf4 or Qe2 into one plan while Black races with ...f6 and queenside expansion.

BLACK AIMS FOR

Black identifies the slowest part of White's buildup and strikes in the center or on the queenside before every attacker arrives.

FINAL SIDE TO MOVE

Black

WHITE'S BEST PRACTICAL PLAN

White preserves the causal order: secure the center, route pieces, create a hook, then open a line with enough force.

FAILURE MODE

Reproducing the full setup when one black move has made the usual route too slow or tactically wrong.

DECISION TEST

Ask: Which move is essential to the position, and which familiar move can be omitted because Black changed the threat? Then compare at least two White candidates against Black's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Store the causal chain, not the diagram: center, route, hook, contact, entry.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. e4 e6 2. d3 d5 3. Nd2 Nf6 4. Ngf3 Be7 5. g3 O-O 6. Bg2 c5 7. O-O Nc6 8. Re1 b5 9. e5 Nd7 10. h4 a5 11. Nf1 b4 12. N1h2 a4 13. Ng4

- O-O: White secures the king and activates a rook; the center can now close or open with less tactical risk.
- Nc6: Black reroutes a knight to c6; name the destination job and the useful move conceded to the opponent.
- Re1: White places a rook behind a pawn break or file expected to open.
- b5: Black gains queenside space and begins the race against White's king attack.
- e5: White gains kingside space and drives the f6 knight while fixing a pawn-chain target.
- Nd7: Black reroutes a knight to d7; name the destination job and the useful move conceded to the opponent.

WHAT THE LINE TEACHES

The classical rehearsal links e5 space, Re1, h4, Nf1-h2-g4, and Bf4 or Qe2 into one plan while Black races with ...f6 and queenside expansion.

WHAT MUST BE CALCULATED

Which move is essential to the position, and which familiar move can be omitted because Black changed the threat? White's attacking or positional plan is: White preserves the causal order: secure the center, route pieces, create a hook, then open a line with enough force. The line fails as a template when: Reproducing the full setup when one black move has made the usual route too slow or tactically wrong.

STORE THIS | Store the causal chain, not the diagram: center, route, hook, contact, entry.

COVER THE ANSWER KEY AND SPEAK EACH ANSWER

Retrieval and self-coaching

1. What center or structural transition defines this position?

2. What is Black's most urgent counterplay, and which pawn break enables it?

3. What is White's primary plan, and which piece or pawn makes it work?

4. What exact question decides the next move?

5. What is the most dangerous way to misuse the remembered plan?

ANSWER KEY

1. The classical rehearsal links e5 space, Re1, h4, Nf1-h2-g4, and Bf4 or Qe2 into one plan while Black races with ...f6 and queenside expansion. 2. Black identifies the slowest part of White's buildup and strikes in the center or on the queenside before every attacker arrives. 3. White preserves the causal order: secure the center, route pieces, create a hook, then open a line with enough force. 4. Which move is essential to the position, and which familiar move can be omitted because Black changed the threat? 5. Reproducing the full setup when one black move has made the usual route too slow or tactically wrong.

BOARD RECONSTRUCTION

Rebuild the position after 18 plies from memory, then replay: 7. O-O Nc6 8. Re1 b5 9. e5 Nd7

PLAY PASS | PLAN EXECUTION AND TACTICAL CONTACT

Play: The main attacking rehearsal

WHY THIS POSITION MATTERS

The classical rehearsal links e5 space, Re1, h4, Nf1-h2-g4, and Bf4 or Qe2 into one plan while Black races with ...f6 and queenside expansion.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The defense-classification tree

WHY THIS POSITION MATTERS

A lifetime KIA repertoire begins by classifying Black's center: French ...e6-d5, Sicilian ...c5, symmetrical ...e5, fianchetto ...g6, or flexible ...b6.

DECISION RULE

Which black break is easiest, and what white move changes its tactical or strategic value?

SIDE TO MOVE

White

BLACK'S COUNTERPLAY

Black aims for the freeing break appropriate to the structure and punishes White for using the wrong stock maneuver.

WHITE'S PLAN

White selects the matching center and route, accepting d4 or c4 structures when they are objectively more active.

MEMORY RULE | Classify the center first; the opening name is only an index.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

A lifetime KIA repertoire begins by classifying Black's center: French ...e6-d5, Sicilian ...c5, symmetrical ...e5, fianchetto ...g6, or flexible ...b6.

BLACK AIMS FOR

Black aims for the freeing break appropriate to the structure and punishes White for using the wrong stock maneuver.

FINAL SIDE TO MOVE

Black

WHITE'S BEST PRACTICAL PLAN

White selects the matching center and route, accepting d4 or c4 structures when they are objectively more active.

FAILURE MODE

Naming the opening before identifying the pawn structure and therefore importing the wrong plan.

DECISION TEST

Ask: Which black break is easiest, and what white move changes its tactical or strategic value? Then compare at least two White candidates against Black's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Classify the center first; the opening name is only an index.

CARD 2

The defense-classification tree

1. Nf3 d5 2. g3 Nf6 3. Bg2 e6 4. O-O Be7 5. d3 O-O 6. Nbd2 c5 7. e4 Nc6 8. Re1

Decision: Which black break is easiest, and what white move changes its tactical or strategic value?

Memory: Classify the center first; the opening name is only an index.

CARD 3

Repairing the system from your games

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 g6 5. Bg2 Bg7 6. O-O Nge7 7. Nbd2 O-O 8. Re1 d6

Decision: At what move did the plan stop fitting the center, and what cue should trigger the better branch next time?

Memory: Repair the first unexplained decision, rehearse it twice, and test it in a slow game.

Reconstruct each card from the final position, then from the opening moves alone.

TWELVE-WEEK CYCLE

Weeks 1-2: decode the three structures. Weeks 3-4: replay all lines from memory. Weeks 5-7: solve the workbook pages. Weeks 8-10: test in slow games or against Fritz. Weeks 11-12: analyze failures and retest the volume examination.

PROMOTION RULE

Advance only when you can explain every memory rule, reproduce the three reference lines, name Black's strongest counterplay, and show at least one analyzed game where the decision appeared.

Do not measure mastery by pages completed. Measure whether the correct questions appear during a real game.
