Mar del Plata - Black's Attacking Engine

Understand the knight routes, ...f5 break, and kingside space race

THIS VOLUME

6

deep lessons

12

lesson positions

30

course pages

Learn the famous attack as a timed mechanism rather than a sequence of gestures.

LEARN THE STRUCTURE, THEN THE LINE

A four-pass method for a theory-heavy opening

1. DECODE THE POSITION

Read the board before the moves. Name the center, each side's break, the worst piece, the king-safety difference, and the race clock.

2. UNDERSTAND THE CAUSAL CHAIN

Every recommendation connects a cue to a reason and a consequence. If you know only the move, you do not yet know the opening.

3. PLAY THE DECISION

Generate Black's candidates, find White's strongest reply, and choose the resulting structure you understand. The move is the end of the reasoning, not the beginning.

4. RETRIEVE UNDER PRESSURE

Cover the answer key, reconstruct the line, and speak the memory rule. Review after 1, 3, 7, 14, and 30 days, then test the idea in a slow game.

THEORY WARNING

This is a durable concept-first repertoire, not a claim to be a live engine database. Before tournament use, verify sharp forcing branches in Fritz or a current database.

Priority order at the board: legality and tactical survival, king safety, forcing moves, central transformation, activity, structure, then the remembered rule.

SIX LINKED LESSONS

Recognition first, execution second

LESSON 024 | PAGE 24

Play: The two-wing clock*The faster plan is the one with forcing moves, not the one with more space.***VOLUME OBJECTIVE**

Learn the famous attack as a timed mechanism rather than a sequence of gestures.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The knight rerouting machine

WHY THIS POSITION MATTERS

The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares.

DECISION RULE

Count whether the knight route loses too many tempi compared with White's c5 break.

SIDE TO MOVE

White

BLACK'S JOB

Coordinate ...f5, ...Nf6, ...f4, and a later ...g5 without abandoning the queenside.

WHITE'S COUNTERPLAY

White prepares c5, b4, and pressure on d6 while using f3 to hold e4.

MEMORY RULE | The knight moves twice because each square serves a different phase.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares.

BLACK AIMS FOR

Coordinate ...f5, ...Nf6, ...f4, and a later ...g5 without abandoning the queenside.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White prepares c5, b4, and pressure on d6 while using f3 to hold e4.

FAILURE MODE

Automatic maneuvering can be too slow if White opens the queenside immediately.

DECISION TEST

Ask: Count whether the knight route loses too many tempi compared with White's c5 break. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | The knight moves twice because each square serves a different phase.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nc6 8. d5 Ne7 9. Ne1 Nd7 10. Nd3 f5 11. Bd2 Nf6 12. f3 f4

- O-O: White secures the king and activates a rook; the central decision can now become concrete.
- Nc6: Black reroutes a knight toward c6; judge the move by its next square and immediate job.
- d5: White claims space or creates a break that changes Black's available time and squares.
- Ne7: Black reroutes a knight toward e7; judge the move by its next square and immediate job.
- Ne1: White reroutes a knight toward e1; judge the move by its next square and immediate job.
- Nd7: Black reroutes a knight toward d7; judge the move by its next square and immediate job.

WHAT THE LINE TEACHES

The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares.

WHAT MUST BE CALCULATED

Count whether the knight route loses too many tempi compared with White's c5 break. White's resistance is: White prepares c5, b4, and pressure on d6 while using f3 to hold e4. The line fails as a template when: Automatic maneuvering can be too slow if White opens the queenside immediately.

STORE THIS | The knight moves twice because each square serves a different phase.

COVER THE ANSWER KEY AND SPEAK EACH ANSWER

Retrieval and self-coaching

1. What center or structural transition defines this position?

2. What is Black's primary plan, and which piece or pawn enables it?

3. What is White's fastest or most forcing counterplay?

4. What exact question decides the next move?

5. What is the most dangerous way to misuse the remembered plan?

ANSWER KEY

1. The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares. 2. Coordinate ...f5, ...Nf6, ...f4, and a later ...g5 without abandoning the queenside. 3. White prepares c5, b4, and pressure on d6 while using f3 to hold e4. 4. Count whether the knight route loses too many tempi compared with White's c5 break. 5. Automatic maneuvering can be too slow if White opens the queenside immediately.

BOARD RECONSTRUCTION

Rebuild the position after 18 plies from memory, then replay: 7. O-O Nc6 8. d5 Ne7 9. Ne1 Nd7

PLAY PASS | PLAN EXECUTION AND TACTICAL CONTACT

Play: The knight rerouting machine

WHY THIS POSITION MATTERS

The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares.

DECISION RULE

Count whether the knight route loses too many tempi compared with White's c5 break.

SIDE TO MOVE

White

BLACK'S JOB

Coordinate ...f5, ...Nf6, ...f4, and a later ...g5 without abandoning the queenside.

WHITE'S COUNTERPLAY

White prepares c5, b4, and pressure on d6 while using f3 to hold e4.

MEMORY RULE | The knight moves twice because each square serves a different phase.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

The f6-knight leaves the f-pawn free, then returns after ...f5 to support ...f4 and kingside entry squares.

BLACK AIMS FOR

Coordinate ...f5, ...Nf6, ...f4, and a later ...g5 without abandoning the queenside.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White prepares c5, b4, and pressure on d6 while using f3 to hold e4.

FAILURE MODE

Automatic maneuvering can be too slow if White opens the queenside immediately.

DECISION TEST

Ask: Count whether the knight route loses too many tempi compared with White's c5 break. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | The knight moves twice because each square serves a different phase.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The pawn-chain attack

**WHY THIS POSITION MATTERS**

Black fixes space with ...f4 and ...g5, then uses ...h5 to create contact rather than merely accumulating pawns.

DECISION RULE

Decide whether to capture, advance, or maintain tension on g4 and h5 by calculating the opened lines.

SIDE TO MOVE

White

BLACK'S JOB

Open a file or diagonal only when queen, rook, bishop, and knight can use it.

WHITE'S COUNTERPLAY

White races with c5 and b4 or closes the kingside with g4 and h3.

MEMORY RULE | Pawns create contact; pieces deliver the attack.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

Black fixes space with ...f4 and ...g5, then uses ...h5 to create contact rather than merely accumulating pawns.

BLACK AIMS FOR

Open a file or diagonal only when queen, rook, bishop, and knight can use it.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White races with c5 and b4 or closes the kingside with g4 and h3.

FAILURE MODE

A pawn storm with no line-opening mechanism becomes an overextended wall.

DECISION TEST

Ask: Decide whether to capture, advance, or maintain tension on g4 and h5 by calculating the opened lines. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Pawns create contact; pieces deliver the attack.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The two-wing clock

**WHY THIS POSITION MATTERS**

White's c5 break and Black's ...f5-f4 advance are simultaneous plans whose value depends on arrival time and resulting access.

DECISION RULE

Count forcing moves on both wings instead of comparing how far the pawns have advanced.

SIDE TO MOVE

White

BLACK'S JOB

Continue the kingside attack only if c7 and d6 can survive long enough.

WHITE'S COUNTERPLAY

White opens the c-file, attacks d6, and may create a queenside passer.

MEMORY RULE | The faster plan is the one with forcing moves, not the one with more space.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

White's c5 break and Black's ...f5-f4 advance are simultaneous plans whose value depends on arrival time and resulting access.

BLACK AIMS FOR

Continue the kingside attack only if c7 and d6 can survive long enough.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White opens the c-file, attacks d6, and may create a queenside passer.

FAILURE MODE

Ignoring a queenside breakthrough because the king is far away can lose material before the attack matures.

DECISION TEST

Ask: Count forcing moves on both wings instead of comparing how far the pawns have advanced. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | The faster plan is the one with forcing moves, not the one with more space.

Prompt: Count forcing moves on both wings instead of comparing how far the pawns have advanced.

Recall: *The faster plan is the one with forcing moves, not the one with more space.*

LESSON 024 Play: The two-wing clock

Prompt: Count forcing moves on both wings instead of comparing how far the pawns have advanced.

Recall: *The faster plan is the one with forcing moves, not the one with more space.*

PASS STANDARD

For each position: name the structure, Black's plan, White's counterplay, one candidate, the strongest reply, and the failure mode. Score one point each; 30 of 36 is a pass.

THREE SCENARIOS TO STORE

One-page repertoire memory sheet

CARD 1

The knight rerouting machine

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nc6 8. d5 Ne7 9. Ne1 Nd7 10. Nd3 f5 11. Bd2 Nf6 12. f3 f4

Decision: Count whether the knight route loses too many tempi compared with White's c5 break.

Memory: The knight moves twice because each square serves a different phase.

CARD 2

The pawn-chain attack

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nc6 8. d5 Ne7 9. Ne1 Nd7 10. Nd3 f5 11. Bd2 Nf6 12. f3 f4
13. Be1 g5 14. g4 Ng6 15. h3 h5

Decision: Decide whether to capture, advance, or maintain tension on g4 and h5 by calculating the opened lines.

Memory: Pawns create contact; pieces deliver the attack.

CARD 3

The two-wing clock

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nc6 8. d5 Ne7 9. Ne1 Nd7 10. Nd3 f5 11. c5 Nf6 12. f3 f4
13. b4 g5 14. cxd6 cxd6

Decision: Count forcing moves on both wings instead of comparing how far the pawns have advanced.

Memory: The faster plan is the one with forcing moves, not the one with more space.

Reconstruct each card from the final position, then from the opening moves alone.

024 Play: The two-wing clock	☐	☐	☐	☐	☐	☐	☐

TWELVE-WEEK CYCLE

Weeks 1-2: decode the three structures. Weeks 3-4: replay all lines from memory. Weeks 5-7: solve the workbook pages. Weeks 8-10: test in slow games or against Fritz. Weeks 11-12: analyze failures and retest the volume examination.

PROMOTION RULE

Advance only when you can explain every memory rule, reproduce the three reference lines, name White's best counterplay, and show at least one analyzed game where the decision appeared.

Do not measure mastery by pages completed. Measure whether the correct questions appear during a real game.
