Petrosian, Gligoric, and Orthodox Alternatives

Handle early d5, Be3, and flexible development without mixing plans

THIS VOLUME

6

deep lessons

12

lesson positions

30

course pages

Recognize the less-forcing Classical branches and select the correct piece arrangement.

LEARN THE STRUCTURE, THEN THE LINE

A four-pass method for a theory-heavy opening

1. DECODE THE POSITION

Read the board before the moves. Name the center, each side's break, the worst piece, the king-safety difference, and the race clock.

2. UNDERSTAND THE CAUSAL CHAIN

Every recommendation connects a cue to a reason and a consequence. If you know only the move, you do not yet know the opening.

3. PLAY THE DECISION

Generate Black's candidates, find White's strongest reply, and choose the resulting structure you understand. The move is the end of the reasoning, not the beginning.

4. RETRIEVE UNDER PRESSURE

Cover the answer key, reconstruct the line, and speak the memory rule. Review after 1, 3, 7, 14, and 30 days, then test the idea in a slow game.

THEORY WARNING

This is a durable concept-first repertoire, not a claim to be a live engine database. Before tournament use, verify sharp forcing branches in Fritz or a current database.

Priority order at the board: legality and tactical survival, king safety, forcing moves, central transformation, activity, structure, then the remembered rule.

SIX LINKED LESSONS

Recognition first, execution second

LESSON 036 | PAGE 24

Play: Orthodox pressure with c6*Flexibility has value only if you eventually choose.***VOLUME OBJECTIVE**

Recognize the less-forcing Classical branches and select the correct piece arrangement.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: Petrosian's early d5

WHY THIS POSITION MATTERS

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

DECISION RULE

Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king.

SIDE TO MOVE

White

BLACK'S JOB

Gain queenside restraint with ...a5, reroute through a6, and prepare ...Nh7 or ...Nd7 with patience.

WHITE'S COUNTERPLAY

White aims for g4, h4, and queenside play while limiting ...f5.

MEMORY RULE | When the king is uncommitted, keep the attack flexible.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

BLACK AIMS FOR

Gain queenside restraint with ...a5, reroute through a6, and prepare ...Nh7 or ...Nd7 with patience.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White aims for g4, h4, and queenside play while limiting ...f5.

FAILURE MODE

Forcing a stock attack before White castles can send play toward the wrong wing.

DECISION TEST

Ask: Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | When the king is uncommitted, keep the attack flexible.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. d5 a5 8. Bg5 h6 9. Bh4 Na6 10. Nd2 Qe8

- Nf3: White reroutes a knight toward f3; judge the move by its next square and immediate job.
- O-O: Black secures the king and activates a rook; the central decision can now become concrete.
- Be2: White changes a bishop's diagonal and the balance between development, pressure, and tempo.
- e5: Black makes direct central contact and asks whether White will close, capture, or maintain tension.
- d5: White claims space or creates a break that changes Black's available time and squares.
- a5: Black changes the pawn skeleton; reassess breaks, open lines, and weakened squares.

WHAT THE LINE TEACHES

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

WHAT MUST BE CALCULATED

Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king. White's resistance is: White aims for g4, h4, and queenside play while limiting ...f5. The line fails as a template when: Forcing a stock attack before White castles can send play toward the wrong wing.

STORE THIS | When the king is uncommitted, keep the attack flexible.

COVER THE ANSWER KEY AND SPEAK EACH ANSWER

Retrieval and self-coaching

1. What center or structural transition defines this position?

2. What is Black's primary plan, and which piece or pawn enables it?

3. What is White's fastest or most forcing counterplay?

4. What exact question decides the next move?

5. What is the most dangerous way to misuse the remembered plan?

ANSWER KEY

1. White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion. 2. Gain queenside restraint with ...a5, reroute through a6, and prepare ...Nh7 or ...Nd7 with patience. 3. White aims for g4, h4, and queenside play while limiting ...f5. 4. Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king. 5. Forcing a stock attack before White castles can send play toward the wrong wing.

BOARD RECONSTRUCTION

Rebuild the position after 14 plies from memory, then replay: 5. Nf3 O-O 6. Be2 e5 7. d5 a5

PLAY PASS | PLAN EXECUTION AND TACTICAL CONTACT

Play: Petrosian's early d5

WHY THIS POSITION MATTERS

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

DECISION RULE

Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king.

SIDE TO MOVE

White

BLACK'S JOB

Gain queenside restraint with ...a5, reroute through a6, and prepare ...Nh7 or ...Nd7 with patience.

WHITE'S COUNTERPLAY

White aims for g4, h4, and queenside play while limiting ...f5.

MEMORY RULE | When the king is uncommitted, keep the attack flexible.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

BLACK AIMS FOR

Gain queenside restraint with ...a5, reroute through a6, and prepare ...Nh7 or ...Nd7 with patience.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White aims for g4, h4, and queenside play while limiting ...f5.

FAILURE MODE

Forcing a stock attack before White castles can send play toward the wrong wing.

DECISION TEST

Ask: Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | When the king is uncommitted, keep the attack flexible.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. d5 a5 8. Bg5 h6 9. Bh4 Na6 10. Nd2 Qe8

- Bg5: White changes a bishop's diagonal and the balance between development, pressure, and tempo.
- h6: Black changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- Bh4: White changes a bishop's diagonal and the balance between development, pressure, and tempo.
- Na6: Black reroutes a knight toward a6; judge the move by its next square and immediate job.
- Nd2: White reroutes a knight toward d2; judge the move by its next square and immediate job.
- Qe8: Black coordinates several plans, but the queen's safety and the opponent's forcing reply must be checked.

WHAT THE LINE TEACHES

White closes the center before castling and uses Bg5 to reduce Black's easy kingside expansion.

WHAT MUST BE CALCULATED

Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king. White's resistance is: White aims for g4, h4, and queenside play while limiting ...f5. The line fails as a template when: Forcing a stock attack before White castles can send play toward the wrong wing.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The Gligoric bishop

WHY THIS POSITION MATTERS

Be3 develops naturally and discourages some immediate plans, so Black uses piece attacks to gain time.

DECISION RULE

Check whether each pawn push attacks a piece and improves a future break.

SIDE TO MOVE

White

BLACK'S JOB

Make the bishop's retreat meaningful by controlling f4 and preparing a central or kingside expansion.

WHITE'S COUNTERPLAY

White wants d5, Qd2, and a stable route for the king.

MEMORY RULE | Chase a piece only when the chasing pawn joins the plan.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

Be3 develops naturally and discourages some immediate plans, so Black uses piece attacks to gain time.

BLACK AIMS FOR

Make the bishop's retreat meaningful by controlling f4 and preparing a central or kingside expansion.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White wants d5, Qd2, and a stable route for the king.

FAILURE MODE

Pawn moves made only to chase can create permanent holes.

DECISION TEST

Ask: Check whether each pawn push attacks a piece and improves a future break. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Chase a piece only when the chasing pawn joins the plan.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: Orthodox pressure with c6

WHY THIS POSITION MATTERS

The Orthodox setup keeps central tension and prepares queenside expansion without committing to a closed-center race.

DECISION RULE

Reassess immediately when the center closes; the piece placement then needs a new plan.

SIDE TO MOVE

White

BLACK'S JOB

Coordinate ...c6, ...b5, and e-file pressure while retaining ...exd4.

WHITE'S COUNTERPLAY

White supports b4 and may choose d5 only when it gains something concrete.

MEMORY RULE | Flexibility has value only if you eventually choose.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

The Orthodox setup keeps central tension and prepares queenside expansion without committing to a closed-center race.

BLACK AIMS FOR

Coordinate ...c6, ...b5, and e-file pressure while retaining ...exd4.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White supports b4 and may choose d5 only when it gains something concrete.

FAILURE MODE

Staying in a flexible shell after the position demands a break produces passivity.

DECISION TEST

Ask: Reassess immediately when the center closes; the piece placement then needs a new plan. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Flexibility has value only if you eventually choose.

SIX-POSITION TEST

Can you retrieve the plan without the chapter?

LESSON 031 Decode: Petrosian's early d5

Prompt: Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king.

Recall: When the king is uncommitted, keep the attack flexible.

LESSON 032 Play: Petrosian's early d5

Prompt: Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king.

Recall: When the king is uncommitted, keep the attack flexible.

LESSON 033 Decode: The Gligoric bishop

Prompt: Check whether each pawn push attacks a piece and improves a future break.

Recall: Chase a piece only when the chasing pawn joins the plan.

LESSON 034 Play: The Gligoric bishop

Prompt: Check whether each pawn push attacks a piece and improves a future break.

Recall: Chase a piece only when the chasing pawn joins the plan.

LESSON 035 Decode: Orthodox pressure with c6

Prompt: Reassess immediately when the center closes; the piece placement then needs a new plan.

Recall: Flexibility has value only if you eventually choose.

LESSON 036 Play: Orthodox pressure with c6

Prompt: Reassess immediately when the center closes; the piece placement then needs a new plan.

Recall: Flexibility has value only if you eventually choose.

PASS STANDARD

For each position: name the structure, Black's plan, White's counterplay, one candidate, the strongest reply, and the failure mode. Score one point each; 30 of 36 is a pass.

THREE SCENARIOS TO STORE

One-page repertoire memory sheet

CARD 1

Petrosian's early d5

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. d5 a5 8. Bg5 h6 9. Bh4 Na6 10. Nd2 Qe8

Decision: Decide whether the first counterplay belongs on f5, c6, or the queenside based on White's king.

Memory: When the king is uncommitted, keep the attack flexible.

CARD 2

The Gligoric bishop

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. Be3 Ng4 8. Bg5 f6 9. Bh4 g5 10. Bg3 Nh6

Decision: Check whether each pawn push attacks a piece and improves a future break.

Memory: Chase a piece only when the chasing pawn joins the plan.

CARD 3

Orthodox pressure with c6

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nbd7 8. Re1 c6 9. Bf1 Re8 10. Rb1 a6

Decision: Reassess immediately when the center closes; the piece placement then needs a new plan.

Memory: Flexibility has value only if you eventually choose.

Reconstruct each card from the final position, then from the opening moves alone.

TWELVE-WEEK CYCLE

Weeks 1-2: decode the three structures. Weeks 3-4: replay all lines from memory. Weeks 5-7: solve the workbook pages. Weeks 8-10: test in slow games or against Fritz. Weeks 11-12: analyze failures and retest the volume examination.

PROMOTION RULE

Advance only when you can explain every memory rule, reproduce the three reference lines, name White's best counterplay, and show at least one analyzed game where the decision appeared.

Do not measure mastery by pages completed. Measure whether the correct questions appear during a real game.
