English and Reti Transpositions

Know when you have reached a KID and when you have not

THIS VOLUME

6

deep lessons

12

lesson positions

30

course pages

Use the same setup against flank openings while reading the central pawn map accurately.

LEARN THE STRUCTURE, THEN THE LINE

A four-pass method for a theory-heavy opening

1. DECODE THE POSITION

Read the board before the moves. Name the center, each side's break, the worst piece, the king-safety difference, and the race clock.

2. UNDERSTAND THE CAUSAL CHAIN

Every recommendation connects a cue to a reason and a consequence. If you know only the move, you do not yet know the opening.

3. PLAY THE DECISION

Generate Black's candidates, find White's strongest reply, and choose the resulting structure you understand. The move is the end of the reasoning, not the beginning.

4. RETRIEVE UNDER PRESSURE

Cover the answer key, reconstruct the line, and speak the memory rule. Review after 1, 3, 7, 14, and 30 days, then test the idea in a slow game.

THEORY WARNING

This is a durable concept-first repertoire, not a claim to be a live engine database. Before tournament use, verify sharp forcing branches in Fritz or a current database.

Priority order at the board: legality and tactical survival, king safety, forcing moves, central transformation, activity, structure, then the remembered rule.

SIX LINKED LESSONS

Recognition first, execution second

LESSON 073 | PAGE 4

Decode: English transposition with d4

Transposition is equality of positions, not similarity of appearance.

LESSON 074 | PAGE 8

Play: English transposition with d4

Transposition is equality of positions, not similarity of appearance.

LESSON 075 | PAGE 12

Decode: Botvinnik-style English center

Count central pawns before naming the plan.

LESSON 076 | PAGE 16

Play: Botvinnik-style English center

Count central pawns before naming the plan.

LESSON 077 | PAGE 20

Decode: Symmetrical Reti center

A setup is not a structure until the central pawns speak.

LESSON 078 | PAGE 24

Play: Symmetrical Reti center

A setup is not a structure until the central pawns speak.

VOLUME OBJECTIVE

Use the same setup against flank openings while reading the central pawn map accurately.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: English transposition with d4

**WHY THIS POSITION MATTERS**

Once White adds d4 and e4, the normal Classical KID map returns despite the different move order.

DECISION RULE

Confirm that every piece and pawn has reached the intended version before recalling theory.

SIDE TO MOVE

White

BLACK'S JOB

Use the same central-break repertoire and identify whether d5 closes the center.

WHITE'S COUNTERPLAY

White may exploit move-order details before committing Nf3 or Be2.

MEMORY RULE | Transposition is equality of positions, not similarity of appearance.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

Once White adds d4 and e4, the normal Classical KID map returns despite the different move order.

BLACK AIMS FOR

Use the same central-break repertoire and identify whether d5 closes the center.

FINAL SIDE TO MOVE

Black

WHITE'S BEST PRACTICAL IDEA

White may exploit move-order details before committing Nf3 or Be2.

FAILURE MODE

Remembering the opening name without checking the exact position causes move-order errors.

DECISION TEST

Ask: Confirm that every piece and pawn has reached the intended version before recalling theory. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Transposition is equality of positions, not similarity of appearance.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. c4 Nf6 2. Nc3 g6 3. d4 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O

- d4: White changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- Bg7: Black changes a bishop's diagonal and the balance between development, pressure, and tempo.
- e4: White changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- d6: Black changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- Nf3: White reroutes a knight toward f3; judge the move by its next square and immediate job.
- O-O: Black secures the king and activates a rook; the central decision can now become concrete.

WHAT THE LINE TEACHES

Once White adds d4 and e4, the normal Classical KID map returns despite the different move order.

WHAT MUST BE CALCULATED

Confirm that every piece and pawn has reached the intended version before recalling theory. White's resistance is: White may exploit move-order details before committing Nf3 or Be2. The line fails as a template when: Remembering the opening name without checking the exact position causes move-order errors.

STORE THIS | Transposition is equality of positions, not similarity of appearance.

COVER THE ANSWER KEY AND SPEAK EACH ANSWER

Retrieval and self-coaching

1. What center or structural transition defines this position?

2. What is Black's primary plan, and which piece or pawn enables it?

3. What is White's fastest or most forcing counterplay?

4. What exact question decides the next move?

5. What is the most dangerous way to misuse the remembered plan?

ANSWER KEY

1. Once White adds d4 and e4, the normal Classical KID map returns despite the different move order. 2. Use the same central-break repertoire and identify whether d5 closes the center. 3. White may exploit move-order details before committing Nf3 or Be2. 4. Confirm that every piece and pawn has reached the intended version before recalling theory. 5. Remembering the opening name without checking the exact position causes move-order errors.

BOARD RECONSTRUCTION

Rebuild the position after 10 plies from memory, then replay: 3. d4 Bg7 4. e4 d6 5. Nf3 O-O

PLAY PASS | PLAN EXECUTION AND TACTICAL CONTACT

Play: English transposition with d4

WHY THIS POSITION MATTERS

Once White adds d4 and e4, the normal Classical KID map returns despite the different move order.

DECISION RULE

Confirm that every piece and pawn has reached the intended version before recalling theory.

SIDE TO MOVE

White

BLACK'S JOB

Use the same central-break repertoire and identify whether d5 closes the center.

WHITE'S COUNTERPLAY

White may exploit move-order details before committing Nf3 or Be2.

MEMORY RULE | Transposition is equality of positions, not similarity of appearance.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

Once White adds d4 and e4, the normal Classical KID map returns despite the different move order.

BLACK AIMS FOR

Use the same central-break repertoire and identify whether d5 closes the center.

FINAL SIDE TO MOVE

Black

WHITE'S BEST PRACTICAL IDEA

White may exploit move-order details before committing Nf3 or Be2.

FAILURE MODE

Remembering the opening name without checking the exact position causes move-order errors.

DECISION TEST

Ask: Confirm that every piece and pawn has reached the intended version before recalling theory. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Transposition is equality of positions, not similarity of appearance.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: Botvinnik-style English center

**WHY THIS POSITION MATTERS**

White controls d5 with c4 and e4 but has not played d4, so the central geometry is different from the KID.

DECISION RULE

Do not force ...f5 merely because both sides have fianchettoed.

SIDE TO MOVE

White

BLACK'S JOB

Challenge d5, use ...c6 or ...Nc6, and consider queenside or kingside play based on pawn locks.

WHITE'S COUNTERPLAY

White may play d3, h3, and f4 while keeping d4 flexible.

MEMORY RULE | Count central pawns before naming the plan.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

White controls d5 with c4 and e4 but has not played d4, so the central geometry is different from the KID.

BLACK AIMS FOR

Challenge d5, use ...c6 or ...Nc6, and consider queenside or kingside play based on pawn locks.

FINAL SIDE TO MOVE

Black

WHITE'S BEST PRACTICAL IDEA

White may play d3, h3, and f4 while keeping d4 flexible.

FAILURE MODE

A KID-looking shell can hide a Botvinnik structure with different breaks.

DECISION TEST

Ask: Do not force ...f5 merely because both sides have fianchettoed. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Count central pawns before naming the plan.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: Symmetrical Reti center

**WHY THIS POSITION MATTERS**

With neither c-pawn committed, the game is a maneuvering struggle rather than a standard KID space concession.

DECISION RULE

Preserve flexibility until the c-pawns reveal the true structure.

SIDE TO MOVE

White

BLACK'S JOB

Develop, contest d5 and f5, and choose ...c5 or ...Nc6 according to White's setup.

WHITE'S COUNTERPLAY

White may use Nbd2, Re1, and c3 or c4 to build later.

MEMORY RULE | A setup is not a structure until the central pawns speak.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

With neither c-pawn committed, the game is a maneuvering struggle rather than a standard KID space concession.

BLACK AIMS FOR

Develop, contest d5 and f5, and choose ...c5 or ...Nc6 according to White's setup.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White may use Nbd2, Re1, and c3 or c4 to build later.

FAILURE MODE

Launching a wing attack while the center can open is premature.

DECISION TEST

Ask: Preserve flexibility until the c-pawns reveal the true structure. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | A setup is not a structure until the central pawns speak.

SIX-POSITION TEST

Can you retrieve the plan without the chapter?

LESSON 073 Decode: English transposition with d4

Prompt: Confirm that every piece and pawn has reached the intended version before recalling theory.

Recall: Transposition is equality of positions, not similarity of appearance.

LESSON 074 Play: English transposition with d4

Prompt: Confirm that every piece and pawn has reached the intended version before recalling theory.

Recall: Transposition is equality of positions, not similarity of appearance.

LESSON 075 Decode: Botvinnik-style English center

Prompt: Do not force ...f5 merely because both sides have fianchettoed.

Recall: Count central pawns before naming the plan.

LESSON 076 Play: Botvinnik-style English center

Prompt: Do not force ...f5 merely because both sides have fianchettoed.

Recall: Count central pawns before naming the plan.

LESSON 077 Decode: Symmetrical Reti center

Prompt: Preserve flexibility until the c-pawns reveal the true structure.

Recall: A setup is not a structure until the central pawns speak.

LESSON 078 Play: Symmetrical Reti center

Prompt: Preserve flexibility until the c-pawns reveal the true structure.

Recall: A setup is not a structure until the central pawns speak.

PASS STANDARD

For each position: name the structure, Black's plan, White's counterplay, one candidate, the strongest reply, and the failure mode. Score one point each; 30 of 36 is a pass.

THREE SCENARIOS TO STORE

One-page repertoire memory sheet

CARD 1

English transposition with d4

1. c4 Nf6 2. Nc3 g6 3. d4 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O

Decision: Confirm that every piece and pawn has reached the intended version before recalling theory.

Memory: Transposition is equality of positions, not similarity of appearance.

CARD 2

Botvinnik-style English center

1. c4 Nf6 2. Nc3 g6 3. g3 Bg7 4. Bg2 O-O 5. e4 d6 6. Nge2 e5 7. O-O

Decision: Do not force ...f5 merely because both sides have fianchettoed.

Memory: Count central pawns before naming the plan.

CARD 3

Symmetrical Reti center

1. Nf3 Nf6 2. g3 g6 3. Bg2 Bg7 4. O-O O-O 5. d3 d6 6. e4 e5

Decision: Preserve flexibility until the c-pawns reveal the true structure.

Memory: A setup is not a structure until the central pawns speak.

Reconstruct each card from the final position, then from the opening moves alone.

TWELVE-WEEK CYCLE

Weeks 1-2: decode the three structures. Weeks 3-4: replay all lines from memory. Weeks 5-7: solve the workbook pages. Weeks 8-10: test in slow games or against Fritz. Weeks 11-12: analyze failures and retest the volume examination.

PROMOTION RULE

Advance only when you can explain every memory rule, reproduce the three reference lines, name White's best counterplay, and show at least one analyzed game where the decision appeared.

Do not measure mastery by pages completed. Measure whether the correct questions appear during a real game.
