lesson positions

30

course pages

Evaluate trades by the destination position and learn which KID advantages survive simplification.

LEARN THE STRUCTURE, THEN THE LINE

A four-pass method for a theory-heavy opening

1. DECODE THE POSITION

Read the board before the moves. Name the center, each side's break, the worst piece, the king-safety difference, and the race clock.

2. UNDERSTAND THE CAUSAL CHAIN

Every recommendation connects a cue to a reason and a consequence. If you know only the move, you do not yet know the opening.

3. PLAY THE DECISION

Generate Black's candidates, find White's strongest reply, and choose the resulting structure you understand. The move is the end of the reasoning, not the beginning.

4. RETRIEVE UNDER PRESSURE

Cover the answer key, reconstruct the line, and speak the memory rule. Review after 1, 3, 7, 14, and 30 days, then test the idea in a slow game.

THEORY WARNING

This is a durable concept-first repertoire, not a claim to be a live engine database. Before tournament use, verify sharp forcing branches in Fritz or a current database.

Priority order at the board: legality and tactical survival, king safety, forcing moves, central transformation, activity, structure, then the remembered rule.

SIX LINKED LESSONS

Recognition first, execution second

LESSON 097 | PAGE 4

Decode: The open-center queen trade

After queens leave, replace attack language with activity language.

LESSON 098 | PAGE 8

Play: The open-center queen trade

After queens leave, replace attack language with activity language.

LESSON 099 | PAGE 12

Decode: The fianchetto central exchange

Simplify the opponent's activity, not your own.

LESSON 100 | PAGE 16

Play: The fianchetto central exchange

Simplify the opponent's activity, not your own.

LESSON 101 | PAGE 20

Decode: The Saemisch structural liquidation

A good transformation leaves a target you can reach.

LESSON 102 | PAGE 24

Play: The Saemisch structural liquidation

A good transformation leaves a target you can reach.

VOLUME OBJECTIVE

Evaluate trades by the destination position and learn which KID advantages survive simplification.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The open-center queen trade

**WHY THIS POSITION MATTERS**

When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details.

DECISION RULE

Count king activity and central weaknesses before welcoming the queen trade.

SIDE TO MOVE

White

BLACK'S JOB

Activate the rook on d8, develop quickly, and judge e4 as a target rather than chasing a vanished kingside attack.

WHITE'S COUNTERPLAY

White seeks simplification, Be3, and control of the d-file.

MEMORY RULE | After queens leave, replace attack language with activity language.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details.

BLACK AIMS FOR

Activate the rook on d8, develop quickly, and judge e4 as a target rather than chasing a vanished kingside attack.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White seeks simplification, Be3, and control of the d-file.

FAILURE MODE

Assuming every queenless KID favors the side with more space can miss Black's active pieces.

DECISION TEST

Ask: Count king activity and central weaknesses before welcoming the queen trade. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | After queens leave, replace attack language with activity language.

INSTRUCTIVE REFERENCE LINE - NOT A PROMISE OF FORCED BEST PLAY

Move-by-move meaning

REFERENCE LINE

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. dxe5 dxe5 8. Qxd8 Rxd8

- e4: White changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- d6: Black changes the pawn skeleton; reassess breaks, open lines, and weakened squares.
- Nf3: White reroutes a knight toward f3; judge the move by its next square and immediate job.
- O-O: Black secures the king and activates a rook; the central decision can now become concrete.
- Be2: White changes a bishop's diagonal and the balance between development, pressure, and tempo.
- e5: Black makes direct central contact and asks whether White will close, capture, or maintain tension.

WHAT THE LINE TEACHES

When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details.

WHAT MUST BE CALCULATED

Count king activity and central weaknesses before welcoming the queen trade. White's resistance is: White seeks simplification, Be3, and control of the d-file. The line fails as a template when: Assuming every queenless KID favors the side with more space can miss Black's active pieces.

STORE THIS | After queens leave, replace attack language with activity language.

COVER THE ANSWER KEY AND SPEAK EACH ANSWER

Retrieval and self-coaching

1. What center or structural transition defines this position?

2. What is Black's primary plan, and which piece or pawn enables it?

3. What is White's fastest or most forcing counterplay?

4. What exact question decides the next move?

5. What is the most dangerous way to misuse the remembered plan?

ANSWER KEY

1. When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details. 2. Activate the rook on d8, develop quickly, and judge e4 as a target rather than chasing a vanished kingside attack. 3. White seeks simplification, Be3, and control of the d-file. 4. Count king activity and central weaknesses before welcoming the queen trade. 5. Assuming every queenless KID favors the side with more space can miss Black's active pieces.

BOARD RECONSTRUCTION

Rebuild the position after 12 plies from memory, then replay: 4. e4 d6 5. Nf3 O-O 6. Be2 e5

PLAY PASS | PLAN EXECUTION AND TACTICAL CONTACT

Play: The open-center queen trade

WHY THIS POSITION MATTERS

When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details.

DECISION RULE

Count king activity and central weaknesses before welcoming the queen trade.

SIDE TO MOVE

White

BLACK'S JOB

Activate the rook on d8, develop quickly, and judge e4 as a target rather than chasing a vanished kingside attack.

WHITE'S COUNTERPLAY

White seeks simplification, Be3, and control of the d-file.

MEMORY RULE | After queens leave, replace attack language with activity language.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

When White releases the center, a queen trade can remove attacking chances and expose development and pawn-endgame details.

BLACK AIMS FOR

Activate the rook on d8, develop quickly, and judge e4 as a target rather than chasing a vanished kingside attack.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White seeks simplification, Be3, and control of the d-file.

FAILURE MODE

Assuming every queenless KID favors the side with more space can miss Black's active pieces.

DECISION TEST

Ask: Count king activity and central weaknesses before welcoming the queen trade. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | After queens leave, replace attack language with activity language.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The fianchetto central exchange

**WHY THIS POSITION MATTERS**

The exchange on d4 transforms space into piece pressure and often produces a strategic middlegame that may simplify further.

DECISION RULE

Forecast which minor piece you want in the ending before initiating trades.

SIDE TO MOVE

White

BLACK'S JOB

Use active rooks and knights, pressure e4, and avoid a passive defense of d6.

WHITE'S COUNTERPLAY

White seeks Be3, Qd2, and exchanges that preserve the better bishop.

MEMORY RULE | Simplify the opponent's activity, not your own.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

The exchange on d4 transforms space into piece pressure and often produces a strategic middlegame that may simplify further.

BLACK AIMS FOR

Use active rooks and knights, pressure e4, and avoid a passive defense of d6.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White seeks Be3, Qd2, and exchanges that preserve the better bishop.

FAILURE MODE

Trading all active pieces can leave Black with only weaknesses.

DECISION TEST

Ask: Forecast which minor piece you want in the ending before initiating trades. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | Simplify the opponent's activity, not your own.

DECODE PASS | STRUCTURAL DECISION POINT

Decode: The Saemisch structural liquidation

WHY THIS POSITION MATTERS

Central exchanges leave White with space and Black with clear targets and queenside breaks.

DECISION RULE

Judge the ending by pawn targets, bishop scope, and king routes, not by space alone.

SIDE TO MOVE

White

BLACK'S JOB

Use ...b5 and piece pressure to force White to defend the advanced center.

WHITE'S COUNTERPLAY

White may castle long and use the open c-file or kingside pawns.

MEMORY RULE | A good transformation leaves a target you can reach.

CUE -> REASON -> MOVE -> REPLY -> NEW POSITION

The plan map

CUE

Central exchanges leave White with space and Black with clear targets and queenside breaks.

BLACK AIMS FOR

Use ...b5 and piece pressure to force White to defend the advanced center.

FINAL SIDE TO MOVE

White

WHITE'S BEST PRACTICAL IDEA

White may castle long and use the open c-file or kingside pawns.

FAILURE MODE

Entering an ending with a permanently weak d6 pawn requires active compensation.

DECISION TEST

Ask: Judge the ending by pawn targets, bishop scope, and king routes, not by space alone. Then compare at least two candidates against White's strongest forcing reply. Choose the endpoint whose center, king safety, and piece jobs you can explain.

RULE | A good transformation leaves a target you can reach.

SIX-POSITION TEST

Can you retrieve the plan without the chapter?

LESSON 097 Decode: The open-center queen trade

Prompt: Count king activity and central weaknesses before welcoming the queen trade.

Recall: After queens leave, replace attack language with activity language.

LESSON 098 Play: The open-center queen trade

Prompt: Count king activity and central weaknesses before welcoming the queen trade.

Recall: After queens leave, replace attack language with activity language.

LESSON 099 Decode: The fianchetto central exchange

Prompt: Forecast which minor piece you want in the ending before initiating trades.

Recall: Simplify the opponent's activity, not your own.

LESSON 100 Play: The fianchetto central exchange

Prompt: Forecast which minor piece you want in the ending before initiating trades.

Recall: Simplify the opponent's activity, not your own.

LESSON 101 Decode: The Saemisch structural liquidation

Prompt: Judge the ending by pawn targets, bishop scope, and king routes, not by space alone.

Recall: A good transformation leaves a target you can reach.

LESSON 102 Play: The Saemisch structural liquidation

Prompt: Judge the ending by pawn targets, bishop scope, and king routes, not by space alone.

Recall: A good transformation leaves a target you can reach.

PASS STANDARD

For each position: name the structure, Black's plan, White's counterplay, one candidate, the strongest reply, and the failure mode. Score one point each; 30 of 36 is a pass.

THREE SCENARIOS TO STORE

One-page repertoire memory sheet

CARD 1

The open-center queen trade

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. dxe5 dxe5 8. Qxd8 Rxd8

Decision: Count king activity and central weaknesses before welcoming the queen trade.

Memory: After queens leave, replace attack language with activity language.

CARD 2

The fianchetto central exchange

1. d4 Nf6 2. c4 g6 3. Nf3 Bg7 4. g3 O-O 5. Bg2 d6 6. O-O Nbd7 7. Nc3 e5 8. e4 c6 9. h3 exd4 10. Nxd4 Re8 11. Re1 Nc5

Decision: Forecast which minor piece you want in the ending before initiating trades.

Memory: Simplify the opponent's activity, not your own.

CARD 3

The Saemisch structural liquidation

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 e5 7. d5 c6 8. Qd2 cxd5 9. cxd5 a6

Decision: Judge the ending by pawn targets, bishop scope, and king routes, not by space alone.

Memory: A good transformation leaves a target you can reach.

Reconstruct each card from the final position, then from the opening moves alone.

TWELVE-WEEK CYCLE

Weeks 1-2: decode the three structures. Weeks 3-4: replay all lines from memory. Weeks 5-7: solve the workbook pages. Weeks 8-10: test in slow games or against Fritz. Weeks 11-12: analyze failures and retest the volume examination.

PROMOTION RULE

Advance only when you can explain every memory rule, reproduce the three reference lines, name White's best counterplay, and show at least one analyzed game where the decision appeared.

Do not measure mastery by pages completed. Measure whether the correct questions appear during a real game.
